In the spring and summer of 2008 the Yukon Bureau of Statistics surveyed approximately 3,000 Yukon businesses and compiled information about their industry types, employees, revenue levels, hiring etc. Due to the substantial difference between home-based businesses and non-home-based businesses, sections of this report separate the two types of businesses.

Because not all businesses answered every question, total numbers given in each category may not be consistent through all sections.

All commentary is based on non-suppressed numbers, see note on page 20.

Businesses	Non-Home-Based	Home-Based	Total

Businesses and Employment

It should be noted that the survey design as well as the selection criteria of the types of businesses included in the Business Survey has varied depending on the focus in any given year. Therefore, direct comparisons over time should be used with caution.

In 2008, the *Professional, Scientific, and Technical Services* industry had the greatest number of businesses at 445, or 15.0% of all businesses surveyed. The *Construction* industry comprised the second largest number of businesses at 391, or 13.2% of total businesses.

Businesses included in Business Survey	2001	2003	2006	2007	2008
Agriculture, Forestry, Fishing, Hunting*	18	16	154	121	152

*The increase in the Agriculture, Forestry, Fishing, Hunting Industry between 2003 and 2006 is due in part to the addition of a new source of businesses to the survey.

Total Number of Businesses by Industry, 2008

Businesses and Employment

**Top Five Industries (by number of businesses),
2001, 2003, 2006 to 2008**

These top five industries have consistently been included in the Yukon Business Survey over this time period, therefore, direct comparisons are possible.

The industry with the highest number of businesses in the 2008 Business Survey was the *Professional and Scientific and Technical Services* sector at 445 businesses. This industry has seen a steady increase in the number of businesses since 2001 when there were 290 businesses surveyed. The *Construction* industry has experienced the highest growth in terms of numbers of businesses when comparing 2001 with 2008. There was an increase of 166 businesses over this time period, from 225 in 2001 to 391 in 2008. *Retail Trade* has remained stable over this period, at roughly 300 businesses. *Accommodation and Food Services*, and *Management of Companies and Enterprises; Administrative and Support Services* have both remained relatively stable since 2001, however both showed increases in 2008 over 2007.

Of these five industries, roughly three-quarters of the *Professional and Scientific and Technical Services*, as well as *Construction*, and *Management of Companies and Enterprises; Administrative and Support Services* were home-based businesses. Conversely, only 35.1% of *Accommodation and Food Services* businesses were home-based and 23.6% of *Retail Trade* businesses were home-based.

For all businesses surveyed, 58.9% were home-based, up from 54.5% in 2007. Non-home-based businesses accounted for 41.1% of all businesses in 2008, compared to 45.5% in 2007.

Businesses and Employment, by Non-Home-Based/Home-Based

It should be noted that when the 'number of employees' is referred to in this report, this is in fact the total number of employees each business had reported. Therefore, this is not necessarily indicative of the actual number of workers in the Yukon given that some workers may have multiple jobs. In this circumstance, multiple job holders would be counted more than once.

The *Retail Trade* industry reported the greatest number of employees of the non-home-based businesses at 2,221 or 23.9%. The *Construction* industry had the largest number of employees of the home-based businesses at 569, or 22.2%.

How many employees are currently working in your business?	# of Businesses reporting	Total # of employees reported	# of Businesses reporting	Total # of employees reported	# of Businesses reporting	Total # of employees reported

Total Number of Employees by Industry Sector, Non-Home-Based and Home-Based Businesses, 2008

Businesses and Employment by Industry Sector

The following tables further breakdown the two largest industry sectors in terms of numbers of workers. In the *Retail Trade* sector, 290 businesses employed a total of 2,306 workers. The largest **sub-sector**, in terms of employment, was *Grocery Stores*, which had 20 businesses that employed 429 workers. The second largest **sub-sector** was *Department Stores*, which had 5 businesses that employed 219 workers.

Retail Trade Sub-sectors	# of businesses reporting	Total # of employees reported
Automobile Dealers	10	155
Other Motor Vehicle Dealers	9	41
Automotive Parts, Accessories and Tire Stores	8	60
Home Furnishings Stores	9	19
Electronics and Appliance Stores	14	106
Building Material and Supplies Dealers	13	126
Grocery Stores	20	429
Specialty Food Stores	7	23
Health and Personal Care Stores	10	135
Gasoline Stations	28	162
Clothing Stores	16	95
Jewellery, Luggage and Leather Goods Stores	5	23
Sporting Goods, Hobby and Musical Instrument Stores	22	97
Book, Periodical and Music Stores	6	67

Other General Merchandise Stores	5	121
Office Supplies, Stationery and Gift Stores	17	89
Used Merchandise Stores	9	24
Other Miscellaneous Store Retailers	21	94
Electronic Shopping and Mail-Order Houses	11	18
Direct Selling Establishments	35	146
Other	10	57
Total	290	2,306

In the *Accommodation and Food Services* industry sector there were 198 businesses employing 1,718 workers. The largest **sub-sector** was *Traveller Accommodation* with almost half of the total businesses as well as almost half of the total workers.

Accommodation and Food Services Sub-sectors	# of businesses reporting	Total # of employees reported
Traveller Accommodation	97	790
RV (Recreational Vehicle) Parks and Recreational Camps	25	69
Full-Service Restaurants	40	489
Limited-Service Eating Places	19	268
Special Food Services	12	21
Drinking Places (Alcoholic Beverages)	5	81
Total	198	1,718

Employees Earning Minimum Wage

For the first time, a question was asked of businesses how many of their employees earned minimum wage. Of the total 11,848 employees reported by all businesses, only 98 employees earned minimum wage. The minimum wage rate is \$8.58 as of April 1st, 2008. Three industry sectors accounted for 81 of the 98 minimum wage earners; *Accommodation and Food Services*, *Information and Cultural Industries*, and *Retail Trade*. The minimum wage earners were split fairly evenly, 52 females and 42 males (*4 respondents did not specify gender*).

Minimum Wage Earners by Industry, 2008

Young Workers

For the first time, employers were also asked if they employed workers aged 14 or younger. Of a total of 11,848 employees, less than 1%, or 87 workers, were aged 14 or younger. 15 of these young workers were employed by home-based businesses and the remaining 72 were employed by non-home-based businesses. The *Retail Trade* and *Accommodation and Food Services* industry sectors accounted for 68 of the 87 young workers.

Workers Aged 14 or less, by Industry, 2008

Businesses and Employees by Community

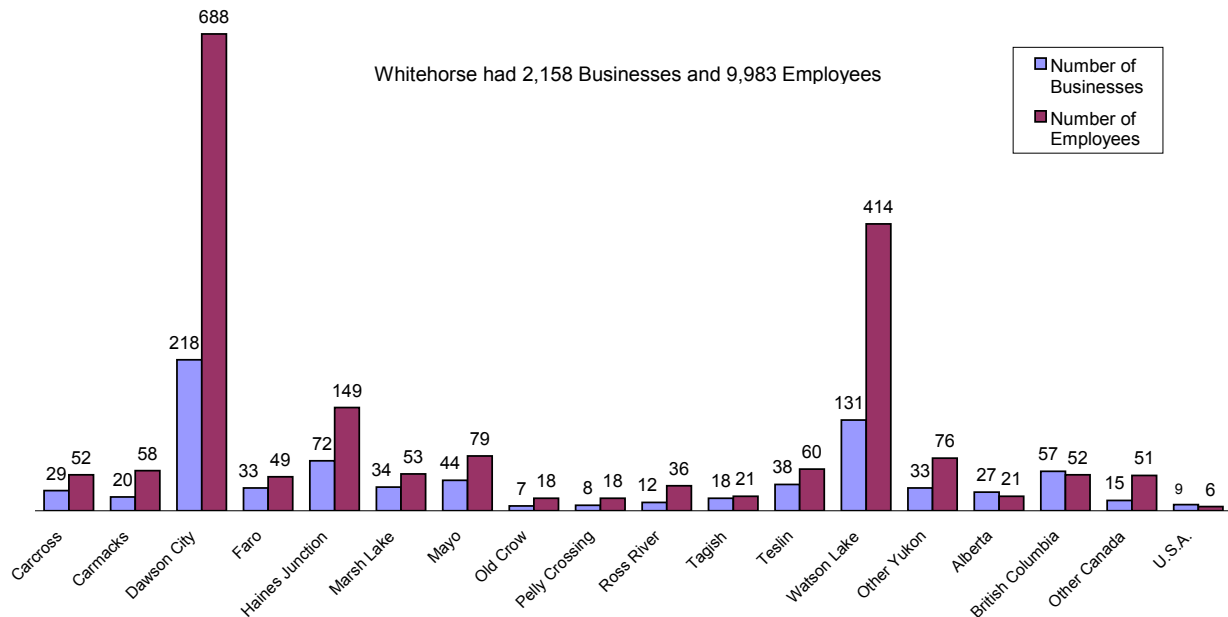

As would be expected, Whitehorse had the highest percent of businesses and employees, at 72.8% and 84.0% respectively. The majority of the remaining businesses were located throughout the Yukon. However, 108 businesses (with a total of 130 employees) reported business headquarters outside of the Yukon.

Yukon Businesses by Ownership Type

The majority of Yukon businesses in 2008 were sole proprietorships, followed by partnerships and corporations. Businesses owned by Yukon First Nation Governments and Yukon First Nation Development Corporations accounted for 1.0% of Yukon businesses.

For the first time, business owners were asked gender and Yukon First Nation ownership questions. The majority of owners were male of both sole proprietorships (63.3%) and partnerships (69.4%). Of the Yukon sole proprietor and partnership businesses, 5.7% were owned by a citizen of a Yukon First Nation. Teslin Tlingit Council had the highest number of businesses owners followed by Liard First Nation. The *Other* category included business owners from Ross River Dene Council, Ta'an Kwach'an Council and White River First Nation. *First Nation identification is self-identified by the respondent.*

Type of Employee

Seasonal Businesses

In the 2008 Business Survey, for the first time seasonal businesses were surveyed during the peak summer months. This allowed for better coverage and more detailed data from these seasonal businesses.

Slightly less than one in five Yukon businesses (18.7%) reported that they were “seasonal” businesses, meaning that they typically only operated during a specific time of the year. There were 553 seasonal businesses in 2008. The following graph indicates that, as would be expected, the number of seasonal businesses in operation was dramatically higher in summer, peaking in August. During the winter months, seasonal businesses in operation decreased substantially and were less than one-third of the summer number. The industry sector with the highest number of businesses in August was in the *Mining and Oil and Gas Extraction* sector. In January the majority of seasonal businesses operating were in the *Agriculture, Forestry, Fishing and Hunting* sector (trappers).

Seasonal Businesses in Operation, by Month

Businesses That Have Websites

Almost one in four businesses reported they had a website in 2008. There were 23.7%, or 701 businesses reporting they had websites in the 2008 Business Survey. Of these 269 were home-based businesses while 432 were non-home-based businesses.

Home-based Businesses with Website

Non-home-based Businesses with Website

Businesses That Export

There were 456 businesses that reported that they exported goods, products or services from the Yukon in 2008. This translates to 15.5% of all Yukon businesses. *Professional, Scientific & Technical Service* sector businesses accounted for just under one-quarter (24.3%) of all business that export.

Industry Sector	Business Does Export	Business Does Not Export	% of Businesses That Export
	-----# of Businesses-----

Exports by Primary Destination* of Goods, Products or Services

There were 150 Yukon businesses exporting primarily to the United States. Of these 150 businesses, 71 reported exports to Alaska. British Columbia was the number one Canadian primary export destination of 140 businesses. There were 59 businesses that exported mainly to international destinations (not including the United States). There was a wide range of exported goods, products and services including furs, gold, flight services and consulting services, etc.

*Some businesses gave multiple primary export destinations

Gross Revenues

Nearly half of all businesses in the Yukon reported gross revenues below \$50,000 for the previous year, 2007. The vast majority, 83.0%, of these were home-based businesses. Over two-thirds of Yukon non-home-based businesses reported gross revenues in 2007 of more than \$100,000, with well over one-third reporting revenues greater than \$550,000. Overall, the *Retail Trade* sector had 113 businesses reporting revenues greater than \$550,000. *Construction* was second, reporting 55 businesses with revenues in excess of \$500,000.

Which of the following broad ranges best describes the 2007 gross revenues?	Less than \$50,000	\$50,000 - \$99,999	\$100,000 - \$549,999	\$550,000 or more	Total

> \$1M	30	80	20	26
Total	350	259	409	184

The graph below shows that for example, for all Retail Trade businesses, the median gross revenue value fell somewhere between \$250,000 and \$400,000. The median point is where half of all businesses are below this point and half above it.

**Median Gross Revenues,
by Revenue Category, 2007**
(for the 4 largest industry sectors)

Source of Revenue

Businesses with Government Purchases as Source of Gross Revenue, 2007

Businesses were asked “*Roughly what percentage of the year 2007 gross revenue of this business came from government purchases, not including contracts?*”. Of 2,761 businesses responding to this question, 2,227, or 80.7% of businesses reported no gross revenue from government purchases in 2007. There were 534 businesses who reported some gross revenue from government purchases, with almost two-thirds of these reporting 10% or less. 32 businesses reported the majority of their 2007 gross revenues came from government purchases.

% of 2007 Gross Revenues from Gov't Purchases	# of Businesses
1-10%	351
11-20%	64
21-30%	43
31-40%	18
41-50%	26
51-60%	11
61-70%	2
71-80%	6
81-90%	6
91-100%	7
Total	534

Businesses with/without Government Contracts as Source of Gross Revenue, 2007

Business owners were asked “*Roughly what percentage of the year 2007 gross revenue of this business came from contracts with each level of government?*”. There were 696 businesses reporting some revenue from contracts with the Yukon Government. In terms of gross revenue, 113 of these businesses reported that between 76% and 100% of their gross revenues were generated from contracts with the Yukon Government. In fact, 59 of these businesses reported 100% of their revenue from this source.

	Federal Gov't	Yukon Gov't	Municipal Gov'ts	First Nations Gov'ts
	----- # of businesses -----			
None	2,521	2,077	2,557	2,446
Some Revenue	276	696	231	339

21-30%	18	57	16	24
31-40%	12	43	6	14
41-50%	9	60	3	27
51-75%	9	58	5	16
76-100%	8	113	4	40

Revenue from Tourism

More than one-quarter (27.1%) of all Yukon businesses (797 out of 2,946) reported that at least a portion of their gross revenue in 2007 was derived from tourism. The two industry sectors with the highest number of businesses reporting some tourism revenue were *Accommodation and Food Services* and *Retail Trade*. Of these 797 businesses reporting some tourism revenue, 650 were able to then respond to the question asking what percentage of gross revenue for 2007 was derived from tourism.

% of Gross Revenue Derived from Tourism, 2007

Of these 650 businesses able to indicate the proportion of gross revenues derived from tourism, 603 were able to further breakdown this tourism revenue as attributable to tourists who live in the Yukon and to those who live outside the Yukon. On average, for these 603 businesses, 21.7% of tourism revenue was derived from tourists who live in the Yukon, while 77.3% was derived from tourists who live outside the Yukon.

% of Tourism Revenue Derived from Tourists Who Live In the Yukon

% of Tourism Revenue Derived from Tourists Who Live Outside the Yukon

Labour Market Demand—Non-Home-Based Businesses

Labour Demand Section

With continued record low unemployment rates, this section of the report deals with the timely issue of labour demand. As in 2007, all businesses in the 2008 Business Survey were asked questions on staffing issues. Since the labour demand issues vary widely between home-based and non-home-based businesses, the two types of businesses are dealt with separately in this report; starting here with the non-home-based businesses, followed by the home-based business section on page 17.

Vacancies in the past Six Months

Of the total number of non-home-based businesses responding when asked if they had any job vacancies in the last six months, 482 (39.9%) said that they did have vacancies. These 482 businesses were then asked if they had difficulties in recruiting new staff and 352 (73.3%) said that they did have difficulty.

Number of New Employees Hired

Almost one third (393, or 32.7%) of all non-home-based businesses indicated that they were able to hire some new employees in the previous six months. Almost half of these businesses had hired one or two new employees, while just over half had hired three or more.

How many new employees has this business hired in the last six months?

Reasons for New Employees Hired¹

The largest group of these new employees (79%) were hired because another employee had left. The next most stated reason, 35%, were hired because the business had grown or expanded. Examples that were included in 'Other reason' at 7%, were seasonality of operation, vacation relief, etc.

Of the 393 non-home-based businesses surveyed that said they had hired new employees in the previous six months, 3,002 employees were actually hired. The sector that hired the most new employees was the *Accommodation and Food Services* sector where 71 businesses hired 857 employees.

Why were these employees hired?¹

¹ A number of businesses gave more than one reason for hiring employees.

Non-Home-Based Businesses

Current Vacancies

Of the 482 non-home-based businesses that indicated they had vacancies in the last 6 months, 252 or just over half reported current vacancies. Only 29.8% (75) of these businesses said they needed one new employee, while 70.2% (177) of the remaining non-home-based businesses needed two or more.

Does this business have current vacancies?

As indicated above, there were 252 non-home-based businesses reporting they had current vacancies. The actual number of positions that needed to be filled total 1,008. The top positions needed in the largest three occupation categories included 86 sales rep/clerks, 80 food/beverage servers and 38 housekeepers in the *Intermediate Sales & Service* category; 33 cashiers and 22 dishwashers within the *Elemental Sales & Service* category; 28 mechanics and 13 welders within the *Trades & Skilled Transport & Equipment Operators* category. The following table details the number of positions that were needed by occupation category.

Current Vacancies in Non-Home-Based Businesses	
Occupation Category of Current Vacant Positions	# Vacant
Senior Management	3
Middle & Other Management	37
Professionals in Business & Finance	2

Home-Based Businesses

As labour demand issues vary widely between home-based and non-home-based businesses, the two types of businesses are dealt with separately in this report. The non-home-based business section starts on page 15, while the home-based-business section follows below.

Vacancies in the past Six Months

Of the total number of home-based businesses responding when asked if they had any job vacancies in the last six months, 134 (7.7%) said that they did have vacancies. These 134 businesses were then asked if they had difficulties in recruiting new staff and 94 (69.1%) said that they did have difficulty.

Number of New Employees Hired

There were 101 home-based businesses, or 5.9%, that indicated they were able to hire some new employees in the previous six months. Almost two-thirds of these businesses had hired one or two new employees, while just over a third had hired three or more.

How many new employees has this business hired in the last six months?

Reason for New Employees Hired¹

The largest group of these new employees (53%) were hired because another employee had left. The next most stated reason, 37%, were hired because the business had grown or expanded. Examples that were included in 'Other reason' at 21% were seasonality of operation and hired for specific contract, etc.

Why were these employees hired?¹

Of the 101 non-home-based businesses surveyed that said they had hired new employees in the previous six months, 464 employees were actually hired. The sector that hired the most new employees was the *Construction* sector, where 41 businesses hired 221 employees.

¹ A number of businesses gave more than one reason for hiring employees.

Home-Based Businesses

Current Vacancies¹

Of the 134 home-based businesses that indicated they had vacancies in the last 6 months, 69 reported current vacancies. Nearly half, 46.4%, (32) of these businesses needed one new employee, while the remaining 53.6% (37) home-based businesses needed two or more employees.

Does this business have current vacancies?

As indicated above, there were 69 home-based businesses reporting they had current vacancies. The actual number of positions that needed to be filled total 153. The top positions needed in the largest three categories of occupations included 33 carpenters and 8 mechanics in the *Trades & Skilled Transport & Equipment Operators* category; 10 general labourers within the *Trades Helpers, Construction Labourers & Related* category; 14 janitors within the *Elemental Sales & Service* category. The following table details the number of positions needed by occupation category.

Staff Recruiting and Retention (both Home-Based and Non-Home Based)

Recognizing the difficulties in finding and hiring new/qualified staff, businesses often try different tactics to retain their existing staff as well as attracting new staff.

Besides trying to recruit more staff, what steps has this business taken in response to labour shortages in the past six months?

A variety of approaches were implemented: 8.9% of all businesses raised wages, 2.2% reduced operating hours, 4.7% extended staff hours, 2.2% mechanized or computerized operations, 9.7% owner/operators extended their own hours, 1.5% stated no steps were taken and 1.8% indicated 'other' which varied from having to cancel projects or turn away work to trying to recruit foreign workers.

Does this business make use of Incentives/Employee Programs/Benefit Packages in an effort to retain existing staff or attract new staff?

Only 586, or 19.9% of all businesses surveyed responded favourably in the use of incentives, programs or benefits. Of these 586 businesses, the following table displays the percentage of these businesses offering each incentive, program or benefit.

Benefits Program <i>[i.e. health/dental, pension, paid vacation, paid sick leave]</i>	58.4%
Financial Incentives <i>[i.e. bonuses, commissions, profit sharing]</i>	65.4%
Employee Discounts <i>[i.e. discounted or free products and service, company gas card]</i>	62.1%
Training	77.3%
Accommodating Work Environment <i>[i.e. flexible work hours, provision of meals, finding work during slow time to keep employees on]</i>	82.3%
Positive Work Environment <i>[i.e. social activities, allowing use of business facilities for personal matters]</i>	82.9%
Wage Increase <i>[i.e. incremental increases based on performance or length of employment]</i>	85.2%
Other <i>[answers varied from travel benefits to creative cash incentives]</i>	10.6%

In the past 6 months, in your search for an employee, have you used or attempted to use any of the following methods/agencies/targeted groups?

Methods/Agencies	
Job Advertisements <i>(from newspapers, trade or professional magazines/journals, etc)</i>	11.5%
Job Posting Boards <i>(such as Yukon College, Skookum Jim, Skills Canada, etc)</i>	8.0%
Employment Program Referral Agencies <i>(Employment Central, Employment Outreach, Yukon Council on Disability, Service d'orientation et formation des adultes, etc.)</i>	7.6%
Online Labour Exchanges or Resources <i>(such as YuWIN, Monster.ca, Jobs.ca, etc.)</i>	5.9%
Government Subsidized Employment Programs <i>(Student Training Education Program, Summer Career Placement, Joint Certificate Program, Target Wage Subsidies, etc.)</i>	2.0%
Yukon Nominee Program	1.3%
Temporary Foreign Worker Program	1.9%
Word-of-mouth	17.3%
Other Agencies	1.7%

Targeted Groups	
Social Assistance Clients	1.4%
Workers from Outside of Canada	3.2%
Disabled Workers	2.0%
Workers Aged 55 and Over <i>Including Retired Workers</i>	6.2%
Students	8.4%
Yukon First Nation or Other Aboriginal People	7.6%
Other Groups	0.7%
None of the Above	8.2%

Number of Current Vacancies by Number of Businesses in Industry Sector

*Other Industry Sectors include: *Rental & Leasing Services; Educational Services; Real Estate; Waste Management and Environmental Remediation Services and Agriculture, Forestry, Fishing, Hunting.*

Of the 1,161 vacant positions, almost one-third, 355 are needed in the *Accommodation and Food Services* industry, 175 in *Retail Trade*, 169 in *Construction* and 89 needed in the *Mining & Oil & Gas Extraction* sector. The industry sector with the most businesses needing new employees is the *Retail Trade* sector at 61 businesses.

Notes: This report functions as a summary of the results of the 2008 Business Survey. For specific data from the survey, please contact the Yukon Bureau of Statistics.
