Beer and cider sales have followed a steady downward trend in terms of the proportion of overall volume of alcohol sold. In 1996/'97, beer and cider sales accounted for 87.2% of the volume of alcohol sold, while in 2006/'07, they accounted for 83.0%. **Volume of Liquor Sold by Type, Yukon, 1996/'97 to 2006/'07**

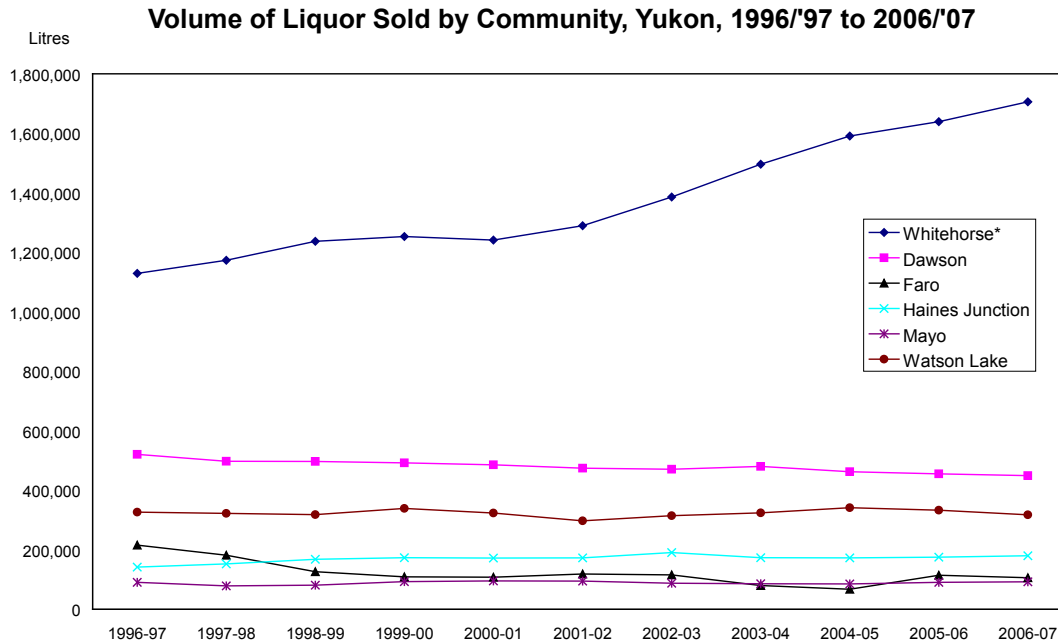

Liquor sales in the Yukon follow a distinct seasonal cycle, peaking in the summer months. In 2006/'07, there were 503,000 litres of liquor sold in June 2006, which accounted for 11.2% of the yearly total. In January 2007, there were 264,700 litres of liquor sold, which accounted for only 5.9% of the yearly total. The large number of travellers visiting the Yukon and the influx of seasonal workers may be responsible for a portion of the increased sales during the summer months. *This should be taken into account when comparing per capita liquor sales in the Yukon with other jurisdictions.* The table below shows monthly sales figures from 1999/'00 to 2006/'07:
