

NOTE: The Yukon RCMP has changed over to a new database management system and software. These publications will be suspended indefinitely pending re-establishing the data.

Highlights

This is an annual publication of the Yukon Bureau of Statistics on reported crime in the Yukon. The statistics are derived from analysis of occurrence reports created and maintained by Yukon detachments of the Royal Canadian Mounted Police (RCMP). Occurrence reports contain information on all official RCMP activities, in particular, investigations of reported criminal activity. In compiling these crime statistics, the Bureau has concentrated on incidents reported by the RCMP that represent offences under Canada's Criminal Code or drug statutes. The statistics are reported as a rate per 100 residents, but **this does not necessarily mean that all crimes were committed by Yukon residents**. Most of the charts and tables in this publication encompass all relevant offences. This contrasts with the national data produced by Statistics Canada which include only the most serious offence in each incident. In order to enable comparisons with national data, the chart on page 14 has been generated using the most serious offence convention. See the definitions on pages 15 and 16 for more information.

The crime rate per 100 residents in the Yukon has fluctuated over the past nine years. In 2003, there were 32.4 Criminal Code and drug incidents reported per 100 residents in the Yukon. The average from 1995 to 2002 was 26.1 incidents per 100 residents. Beaver Creek reported the highest rate in 2003 (74.8) followed by Ross River (68.1). The lowest crime rate in the Yukon per 100 residents in 2003 was reported in Faro (7.2). Whitehorse accounted for the largest number of Criminal Code and drug incidents reported in the Yukon in 2003. However, due to the large percentage of the Yukon population residing in Whitehorse, it was below the average reported 2003 crime rate per 100 residents in the Territory (29.9 in Whitehorse, 32.4 in the Yukon). **For more detail see 'Yukon Crime Statistics 1995 to 2003' under Annual Releases on our website: www.gov.yk.ca/depts/eco/stats/**

**Reported Crime Rate per 100 Residents, Yukon RCMP Detachment Areas
Comparing 2003 with the Average for 1995 to 2002**

The reported crime rate is equal to the number of reported Criminal Code and drug incidents per 100 residents. It is calculated as follows: the total number of Criminal Code and drug incidents reported in each RCMP detachment area in a given year is divided by the June population of the respective RCMP detachment area, and the result is multiplied by 100.

Criminal Code and Drug Crime Rates

Reported Crime Rate per 100 Residents, Yukon RCMP Detachment Areas

	1995	1996	1997	1998	1999	2000	2001	2002	Average 1995 to 2002	2003

Yukon	22.9	23.4	25.1	22.1	24.5	28.8	29.6	32.1	26.1	32.4

When comparing 2003 with the average for 1995 to 2002, the reported crime rate per 100 residents increased in nine of thirteen Yukon RCMP detachment areas. The 2003 crime rate in the Yukon (32.4) was 6.3 incidents per 100 higher than the '95 to '02 average (26.1). From 1995 to 2002, the highest average crime rate per 100 residents was in Pelly Crossing (69.5) and the lowest average crime rate was in Faro (14.2). The average crime rate per 100 residents in Whitehorse was 22.6 for the period 1995 to 2002.

The average number of reported Criminal Code and drug incidents in the Yukon over the eight year period of '95 to '02, was 8,206. In 2003, there were 9,704 incidents reported in the Yukon with 69.2% of all incidents occurring in Whitehorse. However, Whitehorse accounted for 74.2% of the Yukon's population in 2003 (June). Over the past four years the largest number of incidents reported in the Yukon in each year occurred in the third quarter (Q3 = July to Sept).

The total number of crimes reported in Whitehorse increased from 6,352 in 2002 to 6,715 in 2003, an increase of 5.7%. **For a further breakdown (Whitehorse neighbourhoods etc.) see page 9 in 'Yukon Crime Statistics 1995 to 2003' under Annual Releases on our website: www.gov.yk.ca/depts/eco/stats/**

Total Reported Criminal Code and Drug Incidents, Yukon, 1995 to 2003

Violent Incident Rates

Violent incidents include offences that deal with the application, or threat of application, of force to a person. These include homicide, attempted murder, various forms of sexual and non-sexual assault, robbery, and abduction. Traffic incidents that result in death or injury are included under Criminal Code traffic incidents.

Reported Violent Incident Rate per 100 Residents, Yukon RCMP Detachment Areas

	1995	1996	1997	1998	1999	2000	2001	2002	Average 1995 to 2002	2003

Yukon	3.2	3.3	3.4	3.1	3.3	3.6	3.9	3.9	3.5	4.1

The violent incident rate in the Yukon has remained relatively constant, averaging 3.5 incidents per 100 residents from 1995 to 2002. From 1995 to 2002, the Ross River RCMP detachment reported the highest average number of violent incidents per 100 residents in the Yukon (13.7), and this community also had the highest rate for 2003 (17.6). Pelly Crossing averaged 12.4 violent incidents per 100 residents from 1995 to 2002; however, the rate for 2003 was well below that at 8.9. The lowest violent incident rate in the Yukon has consistently been Faro and was again the lowest for 2003 (1.1).

The reported violent incident rate is equal to the number of reported violent incidents per 100 residents. It is calculated as follows: the total number of violent incidents reported in each RCMP detachment area in a given year is divided by the June population of the respective RCMP detachment area, and the result is multiplied by 100.

The average number of reported violent incidents in the Yukon from 1995 to 2002 was 1,096. In 2003, there were 1,232, which is the highest number of reported violent incidents since these statistics were first reported in 1995. Over the past nine years the second highest number of violent incidents in the Yukon was 1,197, which occurred in 2001. The RCMP detachment in Faro reported only four violent incidents in 2003, the lowest in the Territory. The highest number of incidents occurred in Whitehorse, 795, which was an increase of 78, or 9.8%, compared to 2002. **For a further breakdown (Whitehorse neighbourhoods etc.) see page 15 in 'Yukon Crime Statistics 1995 to 2003' under Annual Releases on our website: www.gov.yk.ca/depts/eco/stats/**

Reported Violent Incidents, Yukon, 1995 to 2003

Property Incident Rates

Property incidents involve unlawful acts with the intent of gaining property but do not involve the threat or use of force against an individual. Examples of property crimes are breaking and entering, fraud, and possession of stolen goods.

Reported Property Incident Rate per 100 Residents, Yukon RCMP Detachment Areas

	1995	1996	1997	1998	1999	2000	2001	2002	Average 1995 to 2002	2003

Teslin	7.9	7.5	10.3	8.4	9.4	10.4	9.0	6.8	8.7	8.8
Watson Lake	10.9	10.8	9.8	8.4	10.6	9.4	7.2	11.3	9.8	10.2
Whitehorse	8.1	8.2	8.6	6.8	7.3	8.1	7.4	7.7	7.8	8.5
Yukon	8.8	8.4	8.5	7.3	7.8	8.6	7.5	7.8	8.1	8.2

In 2003, the Ross River RCMP detachment reported the highest property incident rate per 100 residents in the Yukon (16.4). Beaver Creek was second, reporting 12.6 incidents per 100 residents. The lowest property incident rate was reported in Faro (1.1). From 1995 to 2002, the average property incident rate in the Yukon was 8.1 per 100 residents, and was slightly higher in 2003 at 8.2. The highest average from 1995 to 2002 was in Old Crow, which reported 17.6 incidents per 100 residents, but dropped to 7.6 in 2003.

The reported property incident rate is equal to the number of property incidents reported per 100 residents. It is calculated as follows: the total number of property crime incidents reported in each RCMP detachment area in a given year is divided by the June population of the respective RCMP detachment area, and the result is multiplied by 100.

1996		13	73	46	154	47	45	48	53	82	34	38	194	1940	2767
1995		23	45	69	248	73	50	37	58	36	50	38	195	1857	2779

The number of reported property incidents in the Yukon was 2,470 in 2003. This was 92 incidents, or 3.6%, below the average for 1995 to 2002 (2,562). The largest single-year decrease occurred between 1997 and 1998 when the number of incidents in the Yukon decreased by 493 or 17.3%. The majority of property incidents over the past 4 years, occurred in the second and third quarters of each year (Q2 = April to June, Q3 = July to Sept). In 2003, the largest decrease in the number of reported property incidents occurred in the Mayo RCMP detachment area where incidents were down 61.8%, from 76 in 2002 to 29 in 2003. Property incidents in Whitehorse increased by 184 incidents, or 10.7% in 2003 over 2002. **For a further breakdown (Whitehorse neighbourhoods etc.) see page 39 in 'Yukon Crime Statistics 1995 to 2003' under Annual Releases on our website: www.gov.yk.ca/depts/eco/stats/**

Reported Property Incidents, Yukon, 1995 to 2003

Other Criminal Code Incident Rates (Excluding Traffic)

Other Criminal Code incidents involve the remaining Criminal Code offences that are not classified as violent or property incidents (excluding traffic). Examples are property damage, bail violation, breach of probation, disturbing the peace, arson, prostitution, and offensive weapons.

Reported Criminal Code Incident Rate (excluding traffic) per 100 Residents, Yukon RCMP Detachment Areas

	1995	1996	1997	1998	1999	2000	2001	2002	Average 1995 to 2002	2003
Beaver Creek	24.3	9.7	5.2	28.3	55.8	34.2	46.9	40.7	30.6	43.2

Mayo	6.3	7.2	7.7	16.2	17.5	18.0	19.2	24.9	14.6	22.4
Old Crow	23.4	23.3	28.9	27.4	18.1	31.5	41.5	41.9	29.5	49.6
Pelly Crossing	29.0	33.7	28.8	33.8	38.1	59.4	34.4	40.1	37.1	33.5
Ross River	14.9	19.2	39.8	34.2	38.7	43.5	48.7	36.1	34.4	31.3
Teslin	9.7	15.4	16.9	16.7	15.7	10.4	17.3	25.2	15.9	22.4
Watson Lake	17.8	27.9	24.4	25.5	28.7	34.1	36.5	55.2	31.3	45.9
Whitehorse	7.4	7.9	10.0	7.5	8.9	11.6	13.7	14.9	10.2	15.6
Yukon	8.6	9.6	11.1	9.7	11.2	14.1	15.9	17.7	12.2	17.6

In 2003, the other Criminal Code incident rate (excluding traffic) in the Yukon was 17.6 incidents per 100 residents. This is well above the average for 1995 to 2002 (12.2), but slightly below the 2002 figure of 17.7. The highest incident rate for 2003 was in Old Crow at 49.6 incidents per 100 residents, with Watson Lake second at 45.9 and Beaver Creek third at 43.2. The lowest rate for 2003 was reported in Faro at 4.4 incidents per 100 residents.

The other Criminal Code incident rate is equal to the number of other Criminal Code incidents (excluding traffic) reported per 100 residents. It is calculated as follows: the total number of other Criminal Code incidents (excluding traffic) reported in each RCMP detachment area in a given year is divided by the June population of the respective RCMP detachment area, and the result is multiplied by 100.

Other Criminal Code Incidents (Excluding Traffic)

The number of reported other Criminal Code incidents (excluding traffic) in the Yukon decreased by 90 or 1.7%, from 5,372 in 2002 to 5,282 in 2003. This marks the first decrease in the last five years. Similar to property incidents, the majority of other Criminal Code incidents (excluding traffic) occurred in the second and third quarters of the past 4 years (Q2 = April to June, Q3 = July to Sept). There were increases in the number of reported incidents in several communities in 2003 compared to 2002. In Whitehorse, the number of reported other Criminal Code incidents (excluding traffic) increased by 151 incidents, or 4.5%. In Carcross, the number of incidents increased by 29, or 36.3%. In Pelly Crossing the number of incidents decreased by 28 incidents, or 23.7%. **For a further breakdown (Whitehorse neighbourhoods etc.) see page 59 in 'Yukon Crime Statistics 1995 to 2003' under Annual Releases on our website: www.gov.yk.ca/depts/eco/stats/**

Reported Other Criminal Code Incidents (excluding traffic), Yukon, 1995 to 2003

Criminal Code Traffic Incident Rates

Criminal Code traffic incidents include dangerous operation of motor vehicles, impaired operation of motor vehicles, failure to provide breath or blood sample, failure to remain at the scene of an accident, and driving while prohibited.

Reported Criminal Code Traffic Incident Rate per 100 Residents, Yukon RCMP Detachment Areas

	1995	1996	1997	1998	1999	2000	2001	2002	Average 1995 to 2002	2003

Whitehorse	1.1	0.8	1.2	1.3	1.5	1.2	1.4	1.6	1.3	1.6
Yukon	1.5	1.3	1.6	1.5	1.7	1.7	1.6	1.8	1.6	1.8

From 1995 to 2002, the average Criminal Code traffic incident rate in the Yukon was 1.6 incidents per 100 residents, compared with 1.8 in 2003. The highest incidence rate for 2003 was in Beaver Creek at 9.0 incidents per 100 residents. The Beaver Creek RCMP detachment also reported the highest single-year incident rate in the Yukon over the past nine years (12.9 in 1995). Faro had the lowest incidence rate in 2003 at 0.3 which was just slightly above the lowest single-year incident rate reported in Faro (0.2 in 1999).

The rate of Criminal Code traffic incidents is equal to the number of Criminal Code traffic incidents reported per 100 residents. It is calculated as follows: the total number of Criminal Code traffic incidents reported in each RCMP detachment area in a given year is divided by the June population of the respective RCMP detachment area, and the result is multiplied by 100.

The number of reported Criminal Code traffic incidents in the Yukon has fluctuated over the past nine years. From 1995 to 2002, the average number of incidents was 501. In 2003, there were 543 incidents. RCMP detachment in Faro reported only one Criminal Code traffic incidents for the second year in a row. Mayo had the second lowest number of criminal code traffic incidents for 2003 at 7, a decrease of 6 incidents, or 46.2% from 2002. Watson Lake also showed a significant decrease of 35.6%, from 45 in 2002 to 29 in 2003. In Whitehorse, the number of incidents in 2003 (359) remained virtually unchanged from 2002 (358). **For a further breakdown (Whitehorse neighbourhoods etc.) see page 65 in 'Yukon Crime Statistics 1995 to 2003' under Annual Releases on our website: www.gov.yk.ca/depts/eco/stats/**

Reported Criminal Code Traffic Incidents, Yukon, 1995 to 2003

Drug Incident Rates

Drug incidents relate to the possession, trafficking and importation or production of certain controlled or restricted drugs.

Reported Drug Incident Rate per 100 Residents, Yukon RCMP Detachment Areas

	1995	1996	1997	1998	1999	2000	2001	2002	Average 1995 to 2002	2003

Whitehorse	0.6	0.7	0.5	0.4	0.5	0.3	0.5	0.8	0.5	0.6
Yukon	0.7	0.8	0.6	0.5	0.5	0.5	0.6	0.8	0.6	0.6

From 1995 to 2002, the average drug incident rate in the Yukon per 100 residents was 0.6. In 2003, the rate was exactly the same as the average. In 2003, Carcross, Carmacks, Dawson, Haines Junction, and Whitehorse all showed slight increases compared with the average for the previous eight years. Old Crow detachment has reported no drug incidents in the last two years.

In 1998, the Beaver Creek RCMP detachment reported 16.0 drug incidents per 100 residents, the highest single-year rate in the Yukon over the past nine years. From 1995 to 2002, Beaver Creek also reported the highest average drug incident rate in the Yukon (3.7), largely due to the higher number of incidents reported in 1998. In contrast, the Mayo RCMP detachment reported the lowest average drug incident rate per 100 residents in the Yukon (0.2), followed closely by Haines Junction (0.3).

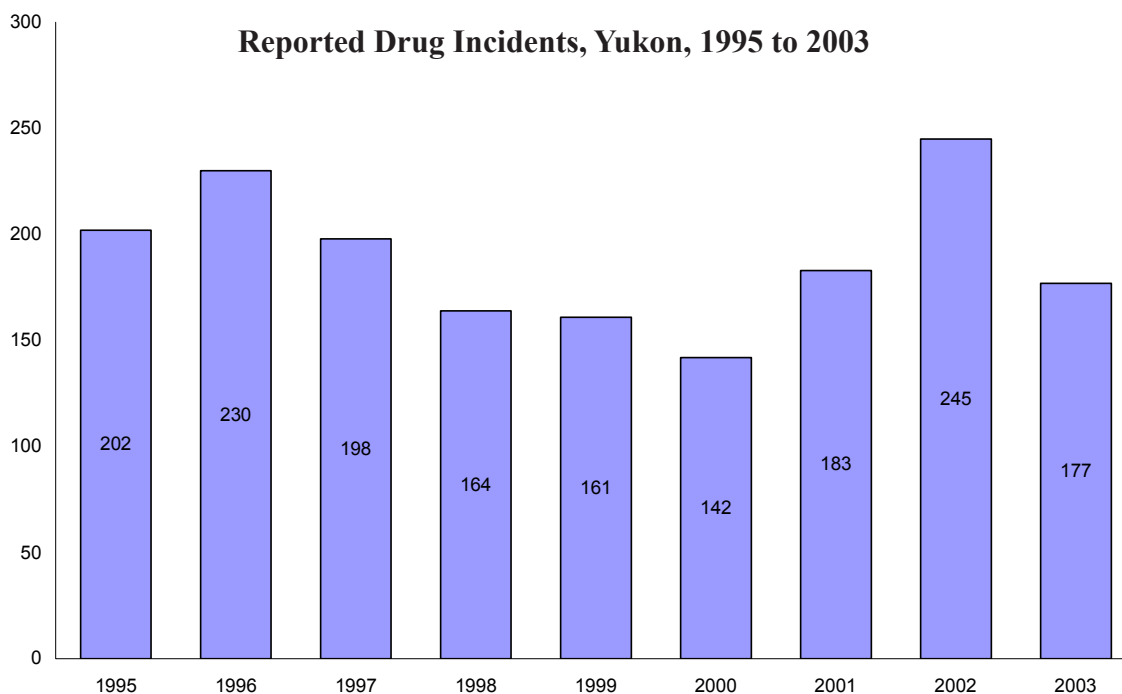

The rate of drug incidents is equal to the number of drug incidents reported per 100 residents. It is calculated as follows: the total number of drug incidents reported in each RCMP detachment area in a given year is divided by the June population of the respective RCMP detachment area, and the result is multiplied by 100.

The number of reported drug incidents in the Yukon for 2003 was 177. This was 14 incidents, or 7.3% below the average for 1995 to 2002. Only three communities reported more than 5 drug incidents in 2003. There were 134 drug incidents reported in Whitehorse in 2003, accounting for 75.7% of all drug incidents in the Yukon. However, the proportion of the Yukon's population residing in Whitehorse was just over 74%. Since 1995, the Mayo RCMP detachment reported a total of ten drug incidents. **For a further breakdown (Whitehorse neighbourhoods etc.) see page 71 in 'Yukon Crime Statistics 1995 to 2003' under Annual Releases on our website: www.gov.yk.ca/depts/eco/stats/**

National Crime Rates

The comparisons on this page are done in accordance with the “most serious offence” convention. See page 15 for more information. The chart in this section is based on data published by Statistics Canada, “Canadian Crime Statistics”, catalogue #85-205. **The most recent year for which these data are available is 2002.**

In 2002 the Yukon again had the third highest crime rate in Canada. From 1995 to 2001, the average number of Criminal Code and drug incidents per 100 residents was 22.5 in the Yukon, while in 2002 the rate was 28.4. The highest crime rate in 2002 was in N.W.T., with 34.4 incidents per 100 residents. The lowest reported crime rate for 2002 was in Newfoundland at 6.3. Newfoundland averaged only 6.2 incidents per 100 residents from 1995 to 2001.

The crime rate in Canada for 2002 (8.3), was below the average for 1995 to 2002 (9.0). The crime rate for Canada has steadily decreased each year from a high of 9.8 incidents per 100 residents in 1995 to 8.3 incidents per 100 residents in 2002. In 2002, the crime rate increased in eight of the 13 provinces and territories compared with the averages from 1995 to 2002. **For more detail see page 121 of ‘Yukon Crime Statistics 1995 to 2003’ under Annual Releases on our website: www.gov.yk.ca/depts/eco/stats/**

Reported Crime Rate per 100 Residents, according to the Most Serious Offence rule, by Province/Territory, 1995-2002

The reported crime rate is equal to the number of reported Criminal Code and drug incidents per 100 residents. It is calculated as follows: the total number of Criminal Code and drug incidents reported to the RCMP in each province and territory in a given year is divided by the July population (Census estimates) of the respective jurisdiction, and the result is multiplied by 100.

* N.W.T. figures include Nunavut from 1995 to 1998. Nunavut figures begin in 1999 when it became a Territory.

Classification of Reported Criminal Code Incidents

Criminal Code incidents are sub-divided into four major groupings: (i) violent incidents, (ii) property incidents, (iii) other Criminal Code incidents (except traffic), and (iv) Criminal Code traffic incidents.

Violent incidents include offences that deal with the application, or threat of application, of force to a person. These include homicide, attempted murder, various forms of sexual and non-sexual assault, robbery, and abduction. Traffic incidents that result in death or injury are included under Criminal Code traffic incidents.

Property incidents involve unlawful acts with the intent of gaining property but do not involve the threat or use of force against an individual. Examples of property crimes are breaking and entering, fraud, possession of stolen goods, etc.

Other Criminal Code incidents involve the remaining Criminal Code offences that are not classified as violent or property incidents (excluding traffic). Examples are property damage, bail violation, breach of probation, disturbing the peace, arson, prostitution, offensive weapons, etc.

Criminal Code traffic incidents include dangerous operation of motor vehicles, impaired operation of motor vehicles, failure to provide breath or blood sample, failure to remain at scene of an accident, driving while prohibited, etc.

Drug Incidents

Drug incidents relate to the possession, trafficking and importation or production of certain controlled or restricted drugs.

Most Serious Offence

The “incident” is the basis for counting reported crime. An incident is the set of connected events usually constituting an occurrence report. National data compiled by Statistics Canada (Uniform Crime Reporting Survey) classify incidents according to the most serious offence occurring in the incident (generally the offence which

carries the longest maximum sentence under the Criminal Code of Canada). In categorizing incidents, violent offences always take precedence over non-violent offences. In order to facilitate comparison with national statistics, the chart on page 14 of this report is compiled utilizing the most serious offence convention. **All other statistics in this publication count all actual incidents.**

Counting Incidents

For violent crimes, a separate incident is recorded for each victim. If, for example, one person assaults three people, then three incidents are recorded. If three people assault one person, only one incident is recorded. For non-violent crimes, one incident is counted for every distinct or separate occurrence. Robbery is one exception to this rule. Robbery is categorized as a violent crime. Unlike all other violent offences, one occurrence of robbery is equal to one incident, regardless of the number of victims.

Thus, the total number of incidents is not a census of all violations of the law that come to attention of the police. Rather, it is equal to the number of victims of violent crimes (other than robberies) plus the number of separate occurrences of non-violent crimes (and robberies).

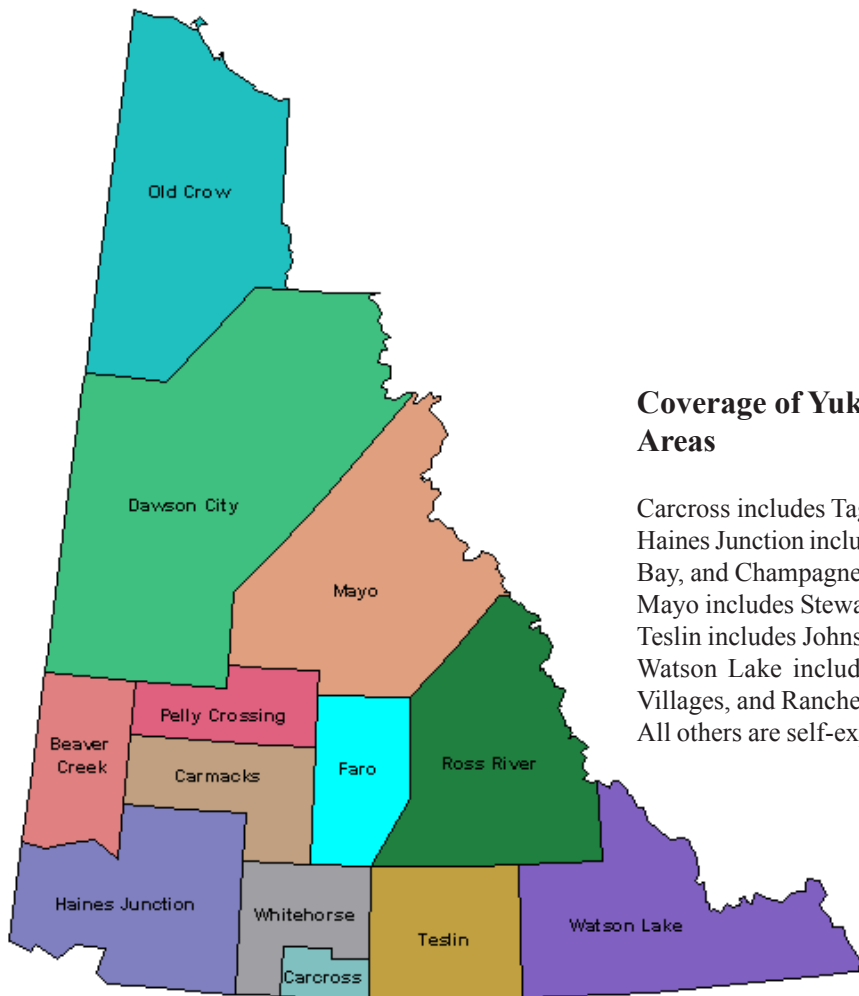

“Actual” and “Unfounded” Incidents

When a crime is reported to the police it is recorded as a “reported” incident. Police then conduct a preliminary investigation to determine the validity of the incident. Occasionally, crimes reported to the police prove to be unfounded. Unfounded incidents are subtracted from the number of reported incidents to produce the number of “actual incidents”.

Additional Information

Additional information on the clearance of actual incidents and persons charged can be found on our website: **See page 75 in ‘Yukon Crime Statistics 1995 to 2003’ under Annual Releases on our website: www.gov.yk.ca/depts/eco/stats/**
