

Yukon Employment Annual Review 2013

Highlights:

- Yukon's 2013 unemployment rate (5.4%) decreased by 1.5 percentage points compared to 2012 (6.9%).
- Compared to 2012 figures, Yukon's labour force remained unchanged at 20,400 in 2013, the number of employed increased by 400 to 19,300 and the number of unemployed decreased by 300 to 1,100.

Labour Force Characteristics, Yukon, 2004 to 2013

Source:
Statistics Canada,
CANSIM 282-0055.

Between 2004 and 2013, Yukon's annual population increased steadily, while the labour force and employment had overall increasing trends. During this period, the unemployment rate ranged from a high of 7.0% in 2009 to a low of 4.4% in 2006.

In 2013, the population aged 15 years and over (27,600) and employment (19,300) reached new peaks, while the labour force (20,400) remained at the record-high level of 2012.

The annual labour force of 20,400 was comprised of 19,300 employed workers (an increase of 400, or 2.1%, over 2012) and 1,100 unemployed workers (a decrease of 300, or 21.4%, compared to 2012). These figures translate into a decrease of 1.5 percentage points in the annual unemployment rate, from 6.9% in 2012 to 5.4% in 2013. Yukon's unemployment rate (5.4%) was 1.7 percentage points lower than the national average (7.1%) in 2013 and for the tenth consecutive year, it was lower than Canada's unemployment rate.

Type of Employment, Yukon, 2004 to 2013

Source: Statistics Canada, CANSIM 282-0055.

In 2013, there were 16,900 (87.6%) full-time workers and 2,400 (12.4%) part-time workers in Yukon. Over the last ten years (2004 to 2013), the proportion of part-time workers averaged at 14.4%. In comparison, the proportion of part-time workers in Canada in 2013 was 18.9%, slightly higher than the average proportion of part-time workers (18.7%) between 2004 and 2013. Yukon had the second lowest proportion (12.4%) of part-time workers in Canada, behind the Northwest Territories (10.2%). The highest proportion of part-time workers was in British Columbia (21.4%).

Reasons for Working Part-Time, Yukon, 2013

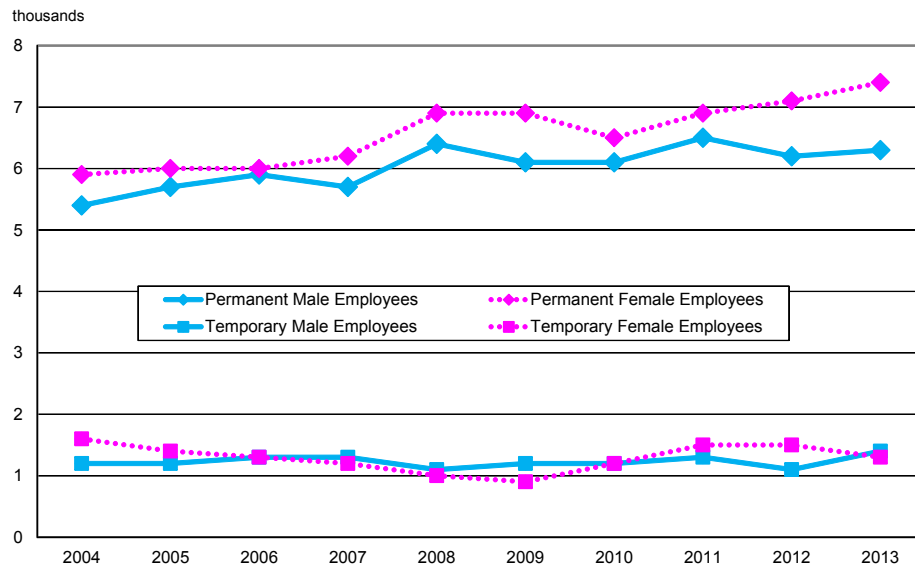

Source: Statistics Canada, Custom data table.

Of Yukon's 2,400 part-time workers in 2013, the following reasons were stated as their main reason for working part-time: 41.7% stated personal preference; 20.8% were going to school; 12.5% cited business conditions (they did not look for full-time work in the last month); 8.3% were caring for children; 8.3% could not find a full-time job (had looked for full-time jobs in the last month); and 8.3% indicated other* reasons.

*Other reasons may include: own illness, other personal or family responsibilities, other voluntary, did not look for full-time jobs in last month and/or business conditions (looked for full-time jobs in last month).

Temporary and Permanent Employees, by Sex, Yukon, 2004 to 2013

Source:
Statistics Canada,
CANSIM 282-0080
and Custom data table.

In 2013, of the 16,400 employees in Yukon, 13,700 (83.5%) were permanent and 2,700 (16.5%) were temporary. Nationally, 86.6% of employees were permanent in 2013 and 13.4% were temporary.

Out of 13,700 permanent Yukon employees, 1,500 (10.9%) were 15 to 24 years of age; 9,800 (71.5%) aged 25-54; and 2,400 (17.5%) were 55 and over. Of the 2,700 temporary Yukon employees, 700 (25.9%) were 15 to 24 years of age; 1,600 (59.3%) aged 25-54; and 400 (14.8%) were 55 and over.

Of the 13,700 permanent employees, 6,300 (46.0%) were male and 7,400 (54.0%) were female. Of the 2,700 temporary employees, 1,400 (51.9%) were male and 1,300 (48.1%) were female.

Average Actual Hours Worked, Yukon, 2004 to 2013

Note: Average actual hours worked is calculated by dividing the total actual hours worked at main job by the number of persons who were at work during the reference week.

Source: Statistics Canada,
CANSIM 282-0026 and
Custom data table.

In Yukon, the average actual hours worked was 32.7 hours per week in 2013. *Occupations unique to primary industry* reported the highest average hours worked, at 45.5 hours per week. *Childcare and home support workers* reported the lowest average hours worked, at 22.8 hours per week.

Canada's average actual hours worked in 2013 was 32.8 hours per week. *Contractors and supervisors in trades and transportation occupations* reported the highest average hours worked, at 41.4 hours per week, while *Retail salespersons, sales clerks, cashiers, including retail trade supervisors* reported the lowest average hours worked, at 26.2 hours per week.

Unemployment Rate, Canada, Provinces and Territories, 2013

Yukon's 2013 unemployment rate of 5.4% was tied with Manitoba for the third lowest in Canada, marking the tenth consecutive year of Yukon's unemployment rate below the national rate. The average unemployment rate over the 10-year period (2004 to 2013), was 5.7% in Yukon and 7.0% in Canada.

Participation Rate, Canada, Provinces and Territories, 2013

In 2013, Yukon's participation rate was the second highest in Canada at 73.9%. Yukon's participation rate over the past ten years (2004 to 2013) averaged at 75.1%, higher than all other provinces and territories with the exception of the Northwest Territories. Canada's average participation rate over the same time period was 67.1%.

Employment Rate, Canada, Provinces and Territories, 2013

In 2013, Yukon's participation rate was the second highest in Canada at 69.9%. Yukon's participation rate over the past ten years (2004 to 2013) averaged at 70.8%, higher than all other provinces and territories. Canada's average participation rate over the same time period was 62.3%.

Source: Statistics Canada, CANSIM 282-0055.

Average Job Tenure in Months, Canada and Yukon, 2004 to 2013

Yukon's average job tenure in 2013 was 87.3 months (about 7.3 years), 2.6% lower than in 2012. Canada's average job tenure in 2013 was 103.3 months (about 8.6 years), 0.7% higher than the average tenure in 2012.

Source: Statistics Canada, CANSIM 282-0038 and Custom data table.

Yukon *Contractors and supervisors in trades and transportation* occupations had the longest job tenure in 2013 at 146.0 months, or just over 12 years, followed by *Professional occupations in health, nurse supervisors and registered nurses* (145.2 months or about 12.1 years) and *Teachers and professors* (133.9 months or about 11.2 years). *Chefs and cooks and occupations in food and beverage services, including supervisors* had the shortest job tenure at 41.4 months (about 3.5 years) in 2013 followed by *Sales and service occupations n.e.c., including occupations in travel and accommodation, attendants in recreation and sport as well as supervisors* (55.1 months or about 4.6 years), and *Retail salespersons, sales clerks, cashiers, including retail trade supervisors* (58.4 months or about 4.9 years).

Overall, Yukon females reported higher job tenure in 2013 (88.5 months or about 7.4 years) than males (87.1 months or about 7.3 years).

Note: Job tenure measures the number of consecutive months or years a person has worked for the current (or most recent) employer. The employee may have worked in one or more occupations or in one or more locations or businesses and still be considered to have continuous tenure if the employer has not changed. But if a person has worked for the same employer over different periods of time, job tenure measures the most recent period of uninterrupted work. A temporary layoff does not constitute an interruption.

Average Annual Days Lost for Personal Reasons, Canada and Yukon, 2004 to 2013

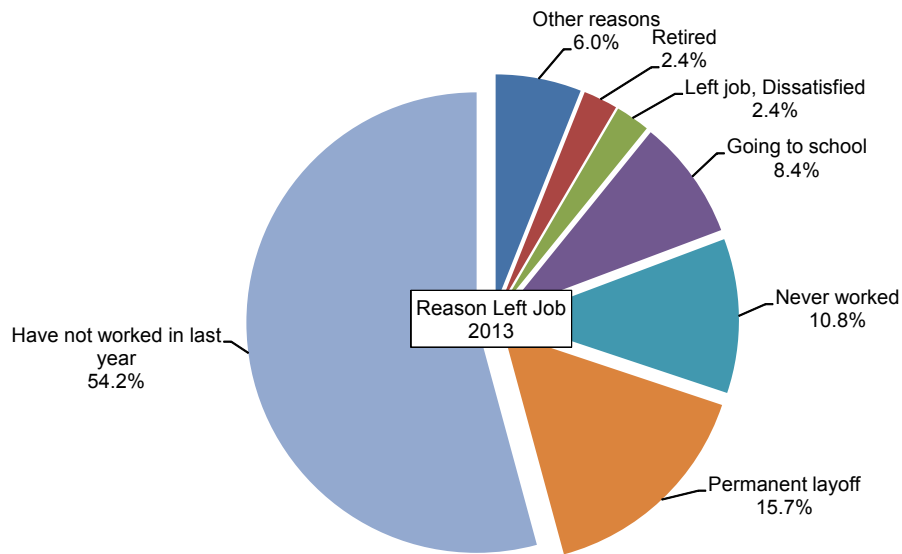

Source: Statistics Canada, CANSIM 282-0030 and Custom data table.

Note: The estimated number of days lost per worker per year is calculated by pro-rating the time lost during the reference week for personal reasons over the whole year. These estimates apply only to full-time employees who are single job holders.

In Canada, an average of 13.2 days were lost per worker for personal reasons in 2013, while in Yukon, an average of 10.0 days were lost per worker for personal reasons. The 2013 Yukon average is comprised of 5.8 days lost due to own illness or disability, (4.5 days for men and 7.0 days for women) and 4.3 days lost to family responsibilities and maternity leave.

Reasons for Leaving Last Job (unemployed and not in labour force), Yukon, 2013

Source: Statistics Canada, Custom data table.

Of the 8,300 persons without a job in 2013 (aged 15 years and above, unemployed or not in labour force), 5,400 *had not worked* in the last year or had never worked (4,500 and 900 respectively). Of the 2,900 who *had worked* in the previous 12 months, 1,400 lost their job by permanent or temporary layoff, 700 left their job to attend school, 200 left citing dissatisfaction, 200 retired and the remaining 400 left for other reasons which may include: own illness or disability, personal or family reasons, etc.

Not in Labour Force (NILF), Yukon, 2004 to 2013

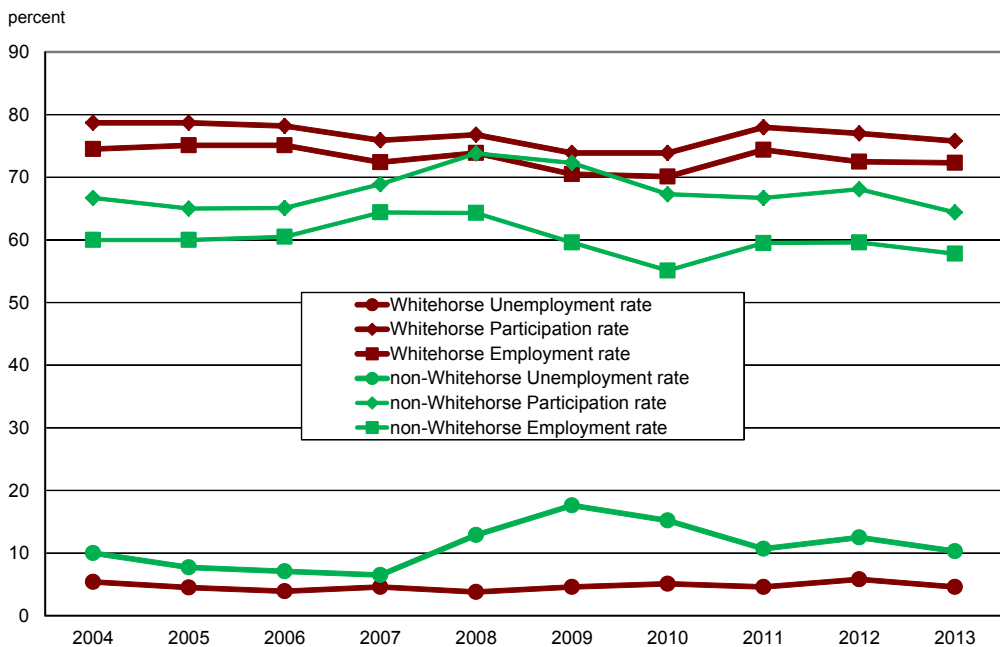

Source: Statistics Canada, Custom data table.

In 2013, of the 7,200 persons who were not in the labour force, 6,900 did not want work or were not available, and 200 did want work. The reason for not looking for work was asked to those who wanted work but did not search for a job. Some of those reasons included illness, personal/family, school, awaiting recall/reply, discouraged (believed no suitable work was available), etc.

Source: Statistics Canada, Custom data table.

- In 2013, the Labour Force Survey in Yukon indicated a decrease of 200 people amongst the Aboriginal population (-3.3%) as well as in the Aboriginal labour force (-4.9%) compared to 2012. The number of non-aboriginal people registered an increase of 800 (+3.8%) and the labour force increased by 200 (+1.2%) .
- Comparing 2013 to 2012 ,the number of employed Aboriginals increased by 100 (+3.0%) . The number of employed non-aboriginals increased by 300 (+1.9%) over this time period.
- Unemployment amongst Aboriginals went down from 700 in 2012 to 500 in 2013 representing a 28.6% decrease. Non-aboriginal unemployment decreased by 100, or 14.3%, during the same time period.
- The Aboriginal unemployment rate decreased by 4.3 percentage points between 2012 and 2013 from 17.1% to 12.8%. The non-aboriginal unemployment rate decreased by 0.7 percentage points from 4.3% to 3.6%.
- In 2013, the participation rate of the Aboriginals in Yukon decreased to 66.1% from 67.2% in 2012. The non-aboriginal participation rate decreased from 78.4% in 2012 to to 76.4% in 2013.
- The employment rate in 2013 amongst the Aboriginals was 57.6%, an increase of 3.5 percentage points from the previous year. The employment rate for Yukon non-aboriginals decreased 1.4 percentage points from 2012.

Source: Statistics Canada, Custom data table.

- In 2013, of the 3,400 employed Yukon Aboriginals, 55.9% were working in the public sector (federal government, Government of Yukon, municipal governments or First Nation governments) and 35.3% were private sector employees. The remaining 8.8% were self-employed. In comparison, non-Aboriginal Yukoners reported 37.1% employment in the public sector, 46.5% were private sector employees, and the remaining 16.4% were self-employed.
- In 2013, 85.3% of employed Aboriginals were working in the *services-producing sector*, primarily in *public administration, health care and social assistance, trade, and educational services* industries. Of the employed Aboriginals, 14.7% were working in the *goods-producing sector*, primarily in *construction*. In comparison, of the employed non-Aboriginals, 85.5% was working in the services-producing sector and 14.5% in the goods-producing sector.
- In 2013, 88.2% of employed Aboriginals worked full-time in Yukon, compared to 87.2% of non-Aboriginals.

Source: Statistics Canada, Custom data table.

- Comparing 2013 to 2012, the participation rate for Aboriginals decreased by 18.6 percentage points for those aged 15-24 years, increased by 6.3 percentage points for those aged 25-54 years and increased by 7.6 percentage points for those aged 55 years and over. Participation rates for non-Aboriginals decreased by 5.5 percentage points, increased by 0.4 percentage points, and decreased by 3.4 percentage points for respective age groups.
- The proportion of the working-age Aboriginal population who were employed in 2013 (57.6%), was 14.1 percentage points higher than the lowest point over the past ten years (2009 rate of 43.5%). The non-Aboriginal employment rate has only varied by 0.7 percentage points over the same period with 2013 rate at 73.6%.

Where the numbers come from

Every month Statistics Canada surveyors in each province and territory of Canada interview a representative sample of individuals 15 years of age and older. The surveyors ask these individuals if they were working, or were looking and available for work, during the “reference week” (usually the 3rd week of the month). Individuals are counted as employed if:

- they worked for at least 1 hour during the reference week (“work” includes self-employment).

Individuals are counted as unemployed if:

- they were without work but had looked for work in the past 4 weeks;
- they had been laid off but were not looking for work because they expected to return to their original work;
- they were not looking for work because they had a new job starting within 4 weeks.

If someone is neither employed nor unemployed, they are then defined as not in the labour force and therefore not counted in the unemployment rate. However, they are still considered to be part of the working-age population.

In Yukon the LFS sample is designed to represent approximately 92% of the working-age population (Yukoners 15 years of age and older). Yukoners living in unorganized areas, full-time members of the armed forces and people living in institutions are not represented in the sample.

As a “household-based” survey, the LFS counts individuals as part of the labour force in the province or territory their home is in. Therefore, if an individual is working outside of Yukon, in the NWT for instance, but still has their home in Yukon, they are counted in Yukon’s labour force.

For the Labour Force Survey in Yukon, estimates are rounded to the nearest hundred and Statistics Canada suppresses any figure that is below 200 to prevent direct or residual disclosure of identifiable data. This is to ensure the confidentiality of each individual respondent to the survey. In turn, percentages (i.e. employment or unemployment rates) based on suppressed numbers will also be suppressed.

Definitions:

1. Employment

Employed persons are those who, during the reference week, did any work for pay or profit, or performed unpaid family work or had a job and were absent from work.

2. Employment rate

Also referred to as “employment/population ratio”, it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

3. Unemployment

Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

4. Unemployment rate

The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.

5. Labour force

The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

6. Not in the labour force

Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

7. Participation rate

The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

8. Goods-Producing Industries

Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

9. Service-Producing Industries

Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.
