

YUKON BUREAU OF STATISTICS

Yukon Employment August 2014

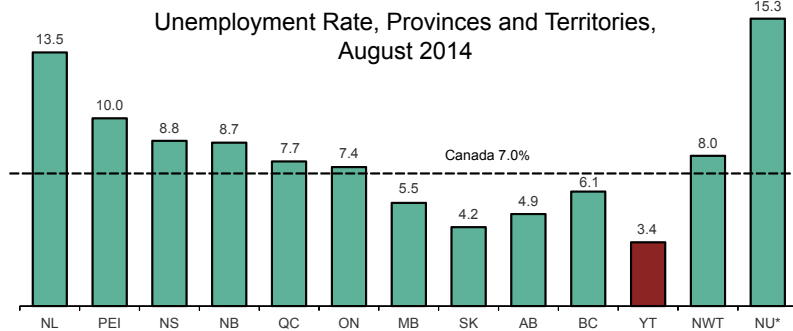

Highlights:

- Yukon's unemployment rate in August 2014 (3.4%) decreased by 0.4 percentage points compared to July 2014 (3.8%) and was the lowest in Canada in August.
- Compared to July 2014 figures, Yukon's labour force remained the same at 20,800, the number of employed increased by 200 to 20,200 and the number of unemployed decreased by 100 to 700.

August 2014

Yukon Employment at a Glance

Labour force	20,800
Employed.....	20,200
Unemployed	700
Unemployment Rate.....	3.4%
Employment Rate.....	73.2%

*Nunavut's unemployment rate is available only as an unadjusted estimate.

Seasonally Adjusted, 25+	4
Unadjusted, 15+	5
Age, Full-time and Part-time.....	6
Industry and Class of Worker ...	7
Definitions.....	8

- Nationally, comparing August 2014 to July 2014 figures, the unemployment rate remained the same at 7.0%.
- Compared to July 2014 figures, the labour force in Canada in August 2014 decreased by 0.1%, the number of employed decreased by 0.1% and the number of unemployed decreased by 0.7%.

Notes: All figures are based on Statistics Canada's Labour Force Survey (LFS) estimates. Statistics Canada reports LFS figures rounded to the nearest hundred. Therefore, components may not add up to the total.

Analyses and data tables in pages 1 through 4 are based on seasonally adjusted numbers. Unadjusted figures are available on pages 5 through 7.

Seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted figures should not be made. For more information, see [definitions on page 8](#).

Comparisons with Canada, Provinces and Territories - Snapshot

Participation Rate, August 2014

Employment Rate, August 2014

*Nunavut's participation rate and employment rate are available only as unadjusted estimates.

The participation rate measures the percentage of the population aged 15 years and over which is working or actively looking for work. Yukon's participation rate in August 2014 was 75.4%, the highest in Canada.

Yukon's August 2014 employment rate (the percentage of the population aged 15 years and over which is employed), at 73.2%, was the highest in Canada.

Comparisons with Canada and Selected Provinces - Historical

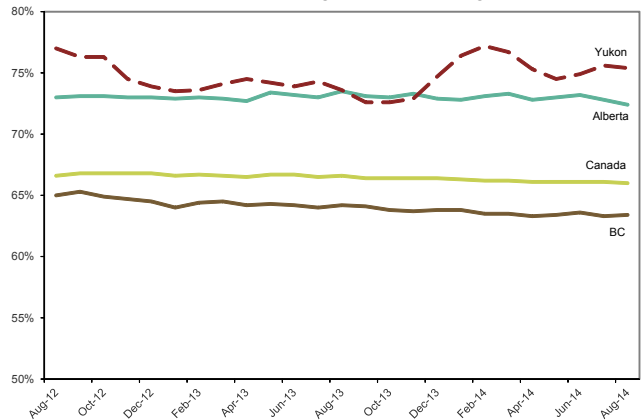

The Labour Force Survey estimates that 75.4% of Yukoners aged 15 years and over were employed or were seeking employment in August 2014.

Yukon's participation rate in August 2014 (75.4%) decreased 0.2 percentage points from July 2014 (75.6%) and increased 1.8 percentage points compared to August 2013 (73.6%).

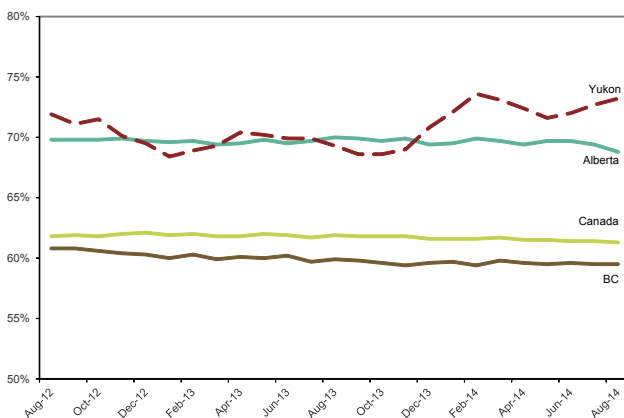

The August 2014 employment rate of 73.2%, increased 0.5 percentage points from July 2014 (72.7%) and was up 3.9 percentage points compared to August 2013 (69.3%).

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's. However, as is often the case with a small population base, our rates show a higher degree of volatility.

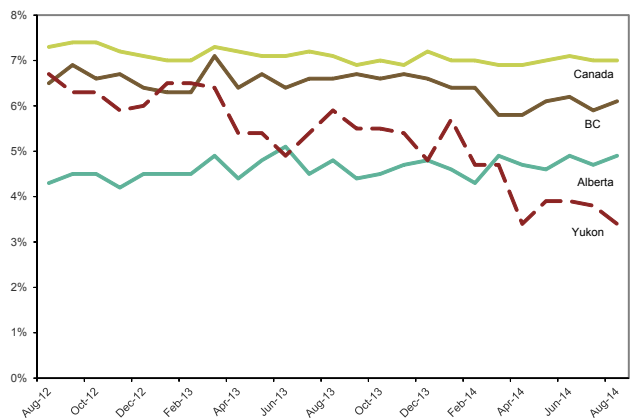

Participation Rate, August 2012 - August 2014

Employment Rate, August 2012 - August 2014

Unemployment Rate, August 2012 - August 2014

Employment by Age and Sex,
August 2012 - August 2014

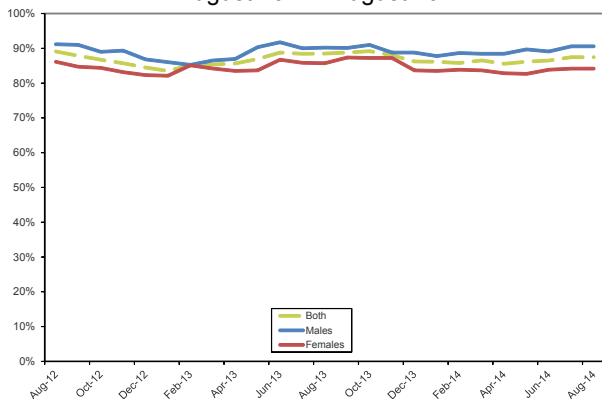

Unemployment Rate by Age and Sex,
August 2012 - August 2014

- Comparing August 2014 to July 2014, the unemployment rate for males aged 15 years and over remained the same at 2.8%, and the rate for males aged 25 years and over decreased from 3.3% to 2.2%. The rate for females aged 15 years and over decreased from 3.8% to 1.9%, and the rate for females aged 25 years over decreased from 3.3% to 2.2%.
- Yukon's youth (aged 15-24) unemployment rate was suppressed in both July and August 2014 as the number of unemployed was below 200. The youth unemployment rate has consistently been under 10% for the last eleven months.

Employment, *Unadjusted*, by Full-time/Part-time, August 2014

Full-time employment as a percentage of all employment,
August 2012 - August 2014

- Of Yukon's workers aged 15 years and over, 18,300, or 87.1%, were employed full-time in August 2014. This was the fifth-highest proportion among all other jurisdictions behind Nunavut (91.1%) and the Northwest Territories (90.1%).
- Nationally, 82.9% of employed Canadians worked full-time in August.
- Of employed Yukon males, 91.5% worked full-time, while 83.7% of employed Yukon females did.
- Comparing August 2014 to July 2014, full-time employment increased by 200 to 18,300, while part-time employment remained the same at 2,600.

Employment, *Unadjusted*, by Industry, August 2014

	Both sexes	Males	Females
Total employed	21,000	10,600	10,400
Goods-producing sector	2,900	2,600	300
Forestry, fishing, mining, oil and gas	600	500	x
Construction	1,800	1,700	x
Services-producing sector	18,100	8,000	10,000
Trade	2,300	1,400	900
Transportation and warehousing	1,000	700	300
Finance, insurance, real estate and leasing	1,000	400	600
Professional, scientific and technical services	1,600	700	800
Educational services	1,500	400	1,100
Health care and social assistance	2,600	500	2,100
Information, culture and recreation	1,200	600	600
Accommodation and food services	1,500	600	900
Other services	700	400	300
Public administration	4,300	1,900	2,400

x = suppressed for confidentiality

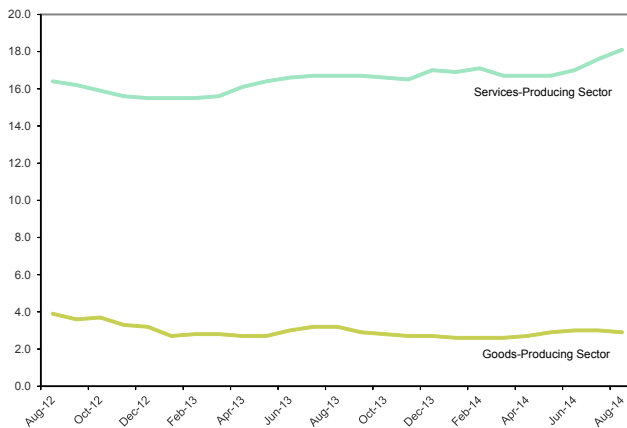

Notes:

The sum of industries does not equal sector totals as industries with fewer than 500 workers are not shown; row data may not add up to industry totals due to rounding.

'Industry' refers to the general nature of the business carried out by the employer for whom the LFS respondent works (main job only).

- In August 2014, 18,100, or 86.2% of working Yukoners were employed in the services-producing sector, while 2,900, or 13.8%, were employed in the goods-producing sector.
- 62.1% of Yukoners working in the goods-producing sector had jobs in the construction industry; 20.7% in the forestry, fishing, mining, oil and gas industries.
- While females accounted for 55.2% of workers in Yukon's services-producing sector, only 10.3% of the goods-producing sector workers were female.

Goods- and Services-Producing Sectors, Employment, August 2012 - August 2014

Goods- and services-producing sectors

The goods-producing sector includes industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector consists primarily of industries in construction and mining.

The services-producing sector includes industries involved in the provision of services.

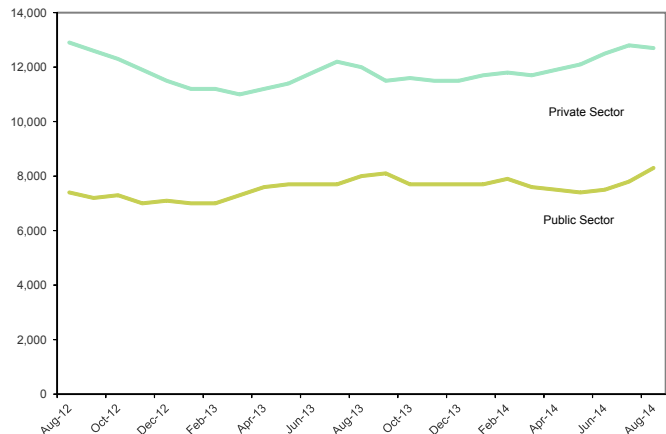

- Employment in Yukon's goods-producing sector peaked in August 2012 with 3,900 workers. Employment in the services-producing sector in August 2014 reached 18,100, the record-high level to date.
- Comparing August 2014 to August 2013, employment in the goods-producing sector decreased by 300, or 9.4%, while employment in the services-producing sector increased by 1,400, or 8.4%.

Public and Private Sectors, *Unadjusted*, August 2014

	Both sexes	Males	Females
Total Employed	21,000	10,600	10,400
Public employees	8,300	3,400	5,000
Total private sector	12,700	7,200	5,400
Private employees	10,200	5,600	4,500
Self-employed	2,500	1,600	900

- In August 2014, 39.5% of working Yukoners were employed by one of the four levels of government in the territory.
- Of the private sector, 19.7% were self-employed.
- In August 2014, private sector employment decreased by 100, or 0.8%, from July 2014, while public sector employment increased by 500, or 6.4%.

Public/Private Sector Employment, August 2012 - August 2014

Notes:

'Employees' include full-time, part-time, permanent and temporary employees.

'Public employees' are those who work for: a government at the federal, provincial, territorial, municipal, First Nations or other Aboriginal government level; a government service or agency; a Crown corporation; or for a government funded establishment such as schools (including colleges/universities), hospitals and public libraries.

'Private employees' include all employees who work for private firms or businesses.

Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as “employment/population ratio,” it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those that are caused

by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April’s unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories’ figures are not included in the calculation of Canada’s numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
