Comparisons with Canada - Snapshot

*Nunavut's participation rate and employment rate are available only as unadjusted estimates.

The participation rate measures the percent of the population which is working or actively looking for work. Yukon's participation rate in February '13 was 72.9%, tied with Alberta for the second-highest in Canada.

Yukon's February employment rate (which measures the percent of the population which is employed), at 68.1%, is third-highest in Canada, due to the high participation rates.

Comparisons with Canada - Historical

The Labour Force Survey estimates that 72.9% of Yukoners age 15 and over were employed or were seeking employment in February.

Over the last year, Yukon's participation rate has tailed off considerably since the Jan '12 rate of 77.9% when it was the highest it had been since June of '02.

Like the participation rate, the Feb '13 employment rate of 68.1%, is the second-lowest rate since the Aug '10 rate of 67.7%. The employment rate has also decreased overall compared to last year.

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's; however, as is often the case with a small population base, our rates show a higher degree of volatility.

Unemployment Rate, 25+, Males and Females, Feb '11 - Feb '13

Labour Force, *Unadjusted* and Annual, age 15+

'Seasonally adjusted' refers to the technique of adjusting figures to remove seasonal movements. As such, seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted should not be made. For more information, see [definitions on pg 8](#).

Employment by Age and Sex, Feb '11 - Feb '13

Unemployment Rate by Age and Sex, Feb '11 - Feb '13

- Comparing Feb '13 figures to Jan '13, the unemployment rate decreased slightly for males in both the 15+ and 25+ age categories. Conversely, the rate for females in both the 15+ and 25+ age category remained low and virtually unchanged. The unemployment rate for males 15+ decreased from 9.5% to 9.3%; males 25+ decreased from 8.3% to 8.1%. The rate for females 15+ increased slightly from 4.0% to 4.1%, while females 25+ remained the same at 3.5%.
- Youth (aged 15-24) have seen consistent unemployment rates above 10% since March of 2011. In Feb '13, the unemployment rate for this age group was 12.5%.

Employment, *Unadjusted*, by Full-time/Part-time, February '13

Full-time employment as a % of all employment Age 15+, Feb '11 - Feb '13

- 15,500, or 85.2%, of Yukon's 15+ workers were employed full-time in Feb '13; the third highest among all other jurisdictions.
- Nationally, 79.9% of employed Canadians worked full time in February.
- 85.2% of employed Yukon males held full-time employment, while 85.1% of females did.
- When comparing Feb '13 to Jan '13 figures, full-time employment increased by 300 of which 100 were males and 200 were females.

Employment, *Unadjusted*, by Industry, February '13

	Both sexes	Males	Females
Total employed	18,200	8,800	9,400
Goods-producing sector	2,800	2,500	300
Forestry, fishing, mining, oil and gas	800	700	x
Construction	1,500	1,400	200
Services-producing sector	15,500	6,300	9,100
Trade	2,100	1,200	900
Transportation and warehousing	900	700	200
Finance, insurance, real estate and leasing	700	400	300
Professional, scientific and technical services	900	400	500
Business, building and other support services	700	400	300
Educational services	1,400	300	1,000
Health care and social assistance	2,700	500	2,200
Information, culture and recreation	1,100	500	600
Accommodation and food services	800	300	600
Other services	600	200	300
Public administration	3,600	1,400	2,200

x = suppressed for confidentiality

Note: The sum of industry rows shown does not equal sector totals as industries with fewer than 500 workers are not shown.

- In Feb '13, 15,500, or 85.2% of working Yukoners were employed in the service-producing sector; 2,800, or 15.4% were employed in the goods-producing sector.
- 53.6% of Yukoners working in the goods-producing sector had jobs in the construction industry.
- While females accounted for 58.7% of workers in Yukon's services-producing sector, only 10.7% of goods-producing sector workers were female.

Goods and services producing sectors

The goods-producing sector includes those industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector are industries primarily in construction and mining.

The services-producing sector includes industries involved in the provision of services.

Goods- and Services-Producing Sectors, Employment, Feb '11 - Feb '13

- Compared to Jan '13 figures, employment in the goods-producing sector was up 100 workers, or 3.7%, to 2,800; while employment in the services-producing sector remained the same at 15,500.
- Comparing Feb '13 to Feb '12, employment in the goods-producing sector increased by 100, or 3.7%, while employment in the services-producing sector decreased by 500, or 3.1%.

Public and Private Sectors, *Unadjusted*, February '13

	Both sexes	Males	Females
Total Employed	18,200	8,800	9,400
Public employees	7,200	2,500	4,700
Total private sector	11,000	6,300	4,800
Private employees	8,100	4,500	3,700
Self-employed	2,900	1,800	1,100

Note: 'Public employees' includes federal, territorial, First Nation and municipal employees.

- In Feb '13, 39.6% of working Yukoners were employed by one of the four levels of government in the territory.
- Of the private sector, 26.4% were self-employed.
- Private sector employment was down by 100, or 0.9% from Feb '12, and public sector employment decreased by 500, or 6.5%.

Public/Private Sector Employment, Feb '11 - Feb '13

Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as “employment/population ratio,” it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal

movements are defined as those that are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April’s unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories’ figures are not included in the calculation of Canada’s numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
