- Age, Full-time and Part-time.....6
- Industry and Class of Worker ...7
- Definitions.....8

Seasonally adjusted refers to the technique of adjusting figures to remove seasonal movements. As such, seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted figures should not be made. For more information, see [definitions on page 8](#).

Unadjusted figures are available on page 5.

# Comparisons with Canada - Snapshot

Participation Rate, January 2014

Employment Rate, January 2014

\*Nunavut's participation rate and employment rate are available only as unadjusted estimates.

The participation rate measures the percent of the population which is working or actively looking for work. Yukon's participation rate in January 2014 was 76.4%, the highest in Canada.

Yukon's January employment rate (the percentage of the population which is employed), at 72.1%, was also the highest in Canada.

# Comparisons with Canada - Historical

The Labour Force Survey estimates that 76.4% of Yukoners aged 15 and over were employed or were seeking employment in January 2014.

Yukon's participation rate in January 2014 (76.4%) increased 1.7 percentage points from the revised December 2013 figure of 74.7% and 2.9 percentage points compared to the revised January 2013 figure of 73.5%.

The January 2014 employment rate of 72.1%, increased 1.3 percentage points from the revised December 2013 figure of 70.8% and was up 3.7 percentage points compared to the revised January 2013 figure of 68.4%.

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's. However, as is often the case with a small population base, our rates show a higher degree of volatility.

Participation Rate, Jan 2012 - Jan 2014

Employment Rate, Jan 2012 - Jan 2014

Unemployment Rate, Jan 2012 - Jan 2014

Each year, Statistics Canada revises seasonally adjusted estimates for the previous three years, using the latest seasonal factors. Numbers presented here reflect those changes.

Employment by Age and Sex, Jan 2012 - Jan 2014

Unemployment Rate by Age and Sex, Jan 2012 - Jan 2014

- Comparing January 2014 to December 2013, the unemployment rate for males aged 15+ increased from 4.9% to 7.5% and the rate for males aged 25+ increased from 4.3% to 6.5%. The rate for females aged 15+ remained the same at 4.9%, and the rate for females aged 25+ increased from 3.2% to 4.3%.
- Yukon's youth unemployment rate (aged 15-24) has been consistently over 10% since May of 2011, with the exception of last five months including January 2014, when it was 8.7%.

# Employment, *Unadjusted*, by Full-time/Part-time, Jan 2014

Full-time employment as a % of all employment Age 15+, Jan 2012 - Jan 2014

- Of Yukon's workers aged 15+, 16,800, or 86.2%, were employed full-time in January 2014. This was the third-highest among all other jurisdictions.
- Nationally, 79.9% of employed Canadians worked full-time in January.
- Of employed Yukon males, 87.8% worked full-time, while of employed Yukon females, 83.5% did.
- Comparing January 2014 to December 2013, full-time employment decreased by 100 to 16,800, while part-time employment remained the same at 2,700.

## Employment, *Unadjusted*, by Industry, Jan 2014

	Both sexes	Males	Females
<b>Total employed</b>	19,500	9,800	9,700
Goods-producing sector	2,600	2,400	200
Construction	1,700	1,600	x
Services-producing sector	16,900	7,400	9,500
Trade	1,900	1,100	800
Transportation and warehousing	1,100	900	200
Finance, insurance, real estate and leasing	900	400	500
Professional, scientific and technical services	1,400	400	900
Business, building and other support services	700	400	300
Educational services	1,400	400	1,000
Health care and social assistance	2,600	500	2,100
Information, culture and recreation	900	400	600
Accommodation and food services	1,300	700	600
Other services	600	400	300
Public administration	4,100	1,900	2,200

x = suppressed for confidentiality

Notes: The sum of industry rows shown does not equal sector totals as industries with fewer than 500 workers are not shown.  
Data may not add up to the totals due to rounding.

- In January 2014, 16,900, or 86.7% of working Yukoners were employed in the services-producing sector, while 2,600, or 13.3% were employed in the goods-producing sector.
- 65.4% of Yukoners working in the goods-producing sector had jobs in the construction industry.
- While females accounted for 56.2% of workers in Yukon's services-producing sector, only 7.7% of goods-producing sector workers were female.

### Goods- and services-producing sectors

The goods-producing sector includes industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector consists primarily of industries in construction and mining.

The services-producing sector includes industries involved in the provision of services.

Goods- and Services-Producing Sectors, Employment, Jan 2012 - Jan 2014

- Employment in Yukon's goods-producing sector peaked in August 2012 with 3,900 workers. Employment in the services-producing sector in December 2013 reached 17,000, the record-high level to date.
- Comparing January 2014 to January 2013, employment in the goods-producing sector decreased by 100, or 3.7%, while employment in the services-producing sector increased by 1,400, or 9.0%.

## Public and Private Sectors, *Unadjusted*, Jan 2014

	Both sexes	Males	Females
<b>Total Employed</b>	19,500	9,800	9,700
Public employees	7,700	3,400	4,400
Total private sector	11,700	6,500	5,300
Private employees	8,800	4,600	4,300
Self-employed	2,900	1,900	1,000

- In January 2014, 39.7% of working Yukoners were employed by one of the four levels of government in the territory.
- Of the private sector, 24.8% were self-employed.
- Private sector employment increased by 200, or 1.7%, from December 2013, while public sector employment remained the same.

### Notes:

"Public" sector includes full-time, part-time, permanent and temporary employees in public administration at the federal, provincial, territorial, municipal, First Nations and other Aboriginal levels as well as in Crown corporations, liquor control boards and other government institutions such as schools (including universities), hospitals and public libraries.

"Private" sector comprises all other employees and self-employed owners of businesses (including unpaid family workers in those businesses), and self-employed persons without businesses.

Public/Private Sector Employment, Jan 2012 - Jan 2014

# Labour Force Survey Definitions

---

**Employment** — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

**Employment rate** — Also referred to as “employment/population ratio,” it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

**Goods-Producing Industries** — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

**Labour force** — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

**Not in the labour force** — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

**Participation rate** — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

**Reference Week** — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

**Seasonal adjustment** — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those that are caused

by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

**Self-employed** — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

**Service-Producing Industries** — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

**Three-Month Moving Average** — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April’s unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories’ figures are not included in the calculation of Canada’s numbers.

**Unemployment** — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

**Unemployment rate** — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
