Notes: All figures are based on Statistics Canada's Labour Force Survey (LFS) estimates. Statistics Canada reports LFS figures rounded to the nearest hundred. Therefore, components may not add up to the total.

Analyses and data tables in pages 1 through 4 are based on seasonally adjusted numbers. Unadjusted figures are available on pages 5 through 7.

Seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted figures should not be made. For more information, see [definitions on page 8](#).

Comparisons with Canada, Provinces and Territories - Snapshot

Participation Rate, January 2015

Employment Rate, January 2015

*Nunavut's participation rate and employment rate are available only as unadjusted estimates.

The participation rate measures the percentage of the population aged 15 years and over, which is working or actively looking for work. Yukon's participation rate in January 2015 was 74.9%, the highest in Canada.

Yukon's January 2015 employment rate (the percentage of the population aged 15 years and over, which is employed), at 71.0%, was also the highest in Canada.

Comparisons with Canada and Selected Provinces - Historical

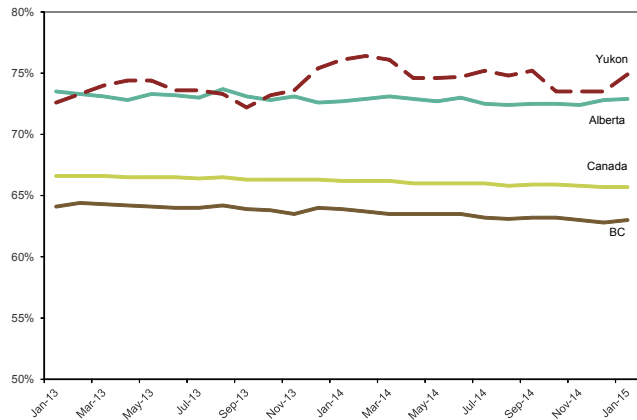

The Labour Force Survey estimates that 74.9% of Yukoners aged 15 years and over were employed or seeking employment in January 2015.

Yukon's participation rate in January 2015 (74.9%) increased 1.4 percentage points compared to the revised rate in December 2014 (73.5%) and decreased 1.2 percentage points compared to the revised rate in January 2014 (76.1%).

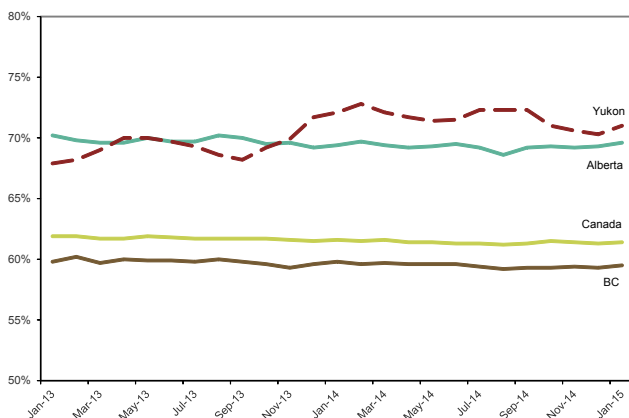

The January 2015 employment rate of 71.0%, increased 0.7 percentage points compared to the revised rate in December 2014 (70.3%) and was down 1.1 percentage points compared to the revised rate in January 2014 (72.1%).

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's. However, as is often the case with a small population base, our rates show a higher degree of volatility.

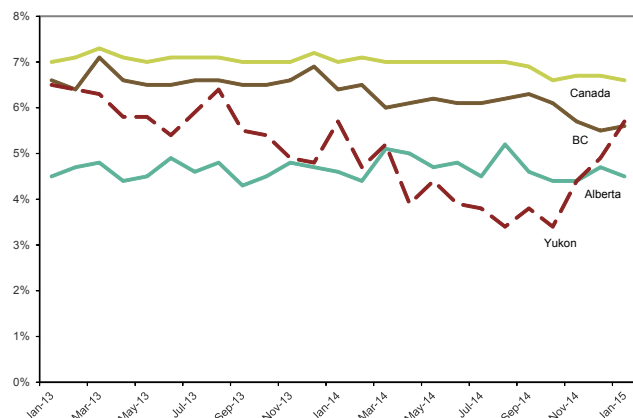

Participation Rate, January 2013 - January 2015

Employment Rate, January 2013 - January 2015

Unemployment Rate, January 2013 - January 2015

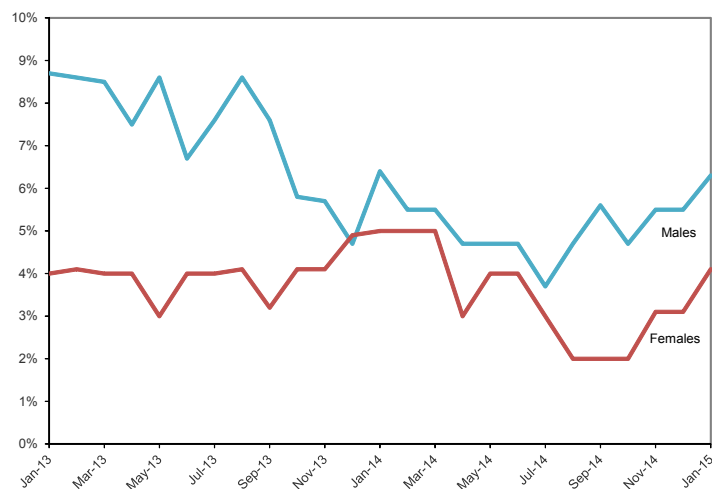

Each year, Statistics Canada revises seasonally adjusted estimates for the previous three years, using the latest seasonal factors. In addition to this annual revision, historic data has also been adjusted to reflect population update to the 2011 Census. Numbers presented here reflect those changes.

Employment by Age and Sex, January 2013 - January 2015

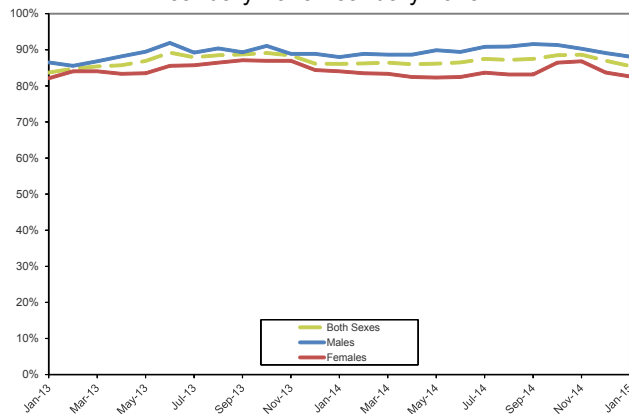

Unemployment Rate by Age and Sex, January 2013 - January 2015

- Comparing January 2015 to revised rates for December 2014, the unemployment rate for males aged 15 years and over increased from 5.6% to 7.3%, and the rate for males aged 25 years and over increased from 5.4% to 7.4%. The rate for females aged 15 years increased from 3.2% to 4.2%, and the rate for females aged 25 years over increased from 3.5% to 4.7%.
- Until December 2014, revised unemployment rates for Yukon's youth (aged 15-24) had been suppressed since July 2014 as the number of unemployed was below 200 in each of the previous five months. In January 2015 the rate was 8.0%. Youth's unemployment rate has consistently been under 10% for the last 17 months.

Employment, *Unadjusted*, by Full-time/Part-time, January 2015

Full-time employment as a percentage of all employment, January 2013 - January 2015

- Of Yukon's workers aged 15 years and over, 16,500, or 85.5%, were employed full-time in January 2015. This was the third-highest proportion among all other jurisdictions behind the Nunavut (89.4%) and Northwest Territories (89.4%).
- Nationally, 79.8% of employed Canadians worked full-time in January.
- Of employed Yukon males, 88.1% worked full-time, compared to 82.6% of employed Yukon females did.
- Comparing January 2015 to revised figures for December 2014, full-time employment decreased by 200 to 16,500, while part-time employment increased by 200 to 2,800.

Employment, *Unadjusted*, by Industry, January 2015

| | Both sexes | Males | Females |
|---|------------|--------|---------|
| Total employed | 19,300 | 10,100 | 9,200 |
| Goods-producing sector | 2,600 | 2,300 | 300 |
| Construction | 1,700 | 1,500 | 200 |
| Services-producing sector | 16,600 | 7,800 | 8,900 |
| Trade | 2,500 | 1,500 | 1,000 |
| Transportation and warehousing | 800 | 600 | 200 |
| Finance, insurance, real estate and leasing | 800 | 400 | 400 |
| Professional, scientific and technical services | 1,100 | 600 | 500 |
| Educational services | 2,000 | 600 | 1,300 |
| Health care and social assistance | 2,500 | 500 | 2,000 |
| Information, culture and recreation | 1,300 | 800 | 400 |
| Accommodation and food services | 1,200 | 600 | 500 |
| Other Services | 700 | 400 | 200 |
| Public administration | 3,500 | 1,500 | 2,000 |

x = suppressed for confidentiality

Notes:

The sum of industries does not equal sector totals as industries with fewer than 500 workers are not shown; row data may not add up to industry totals due to rounding.

'Industry' refers to the general nature of the business carried out by the employer for whom the LFS respondent works (main job only).

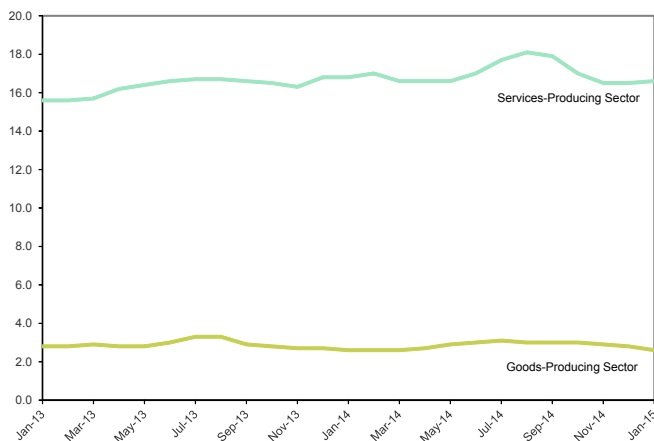

- In January 2015, 16,600, or 86.0% of working Yukoners were employed in the services-producing sector, while 2,600, or 13.5%, were employed in the goods-producing sector.
- 65.4% of Yukoners working in the goods-producing sector had jobs in the construction industry.
- While females accounted for 53.6% of workers in Yukon's services-producing sector, only 11.5% of the goods-producing sector workers were female.

Goods- and services-producing sectors

The goods-producing sector includes industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector consists primarily of industries in construction and mining.

The services-producing sector includes industries involved in the provision of services.

Goods- and Services-Producing Sectors, Employment, January 2013 - January 2015

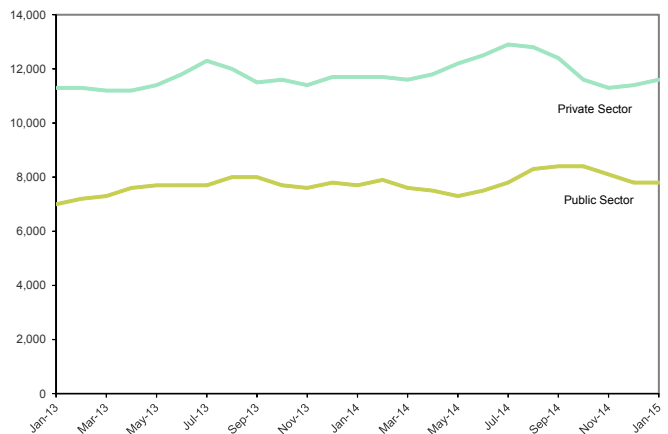

- Employment in Yukon's goods-producing sector peaked in August 2012 (revised) with 4,000 workers. Employment in the services-producing sector in August 2014 reached a record-high level of 18,100.
- Comparing January 2015 to revised figures for January 2014, employment in the goods-producing sector remained the same at 2,600, while employment in the services-producing sector decreased by 200 workers, or 1.2%.

Public and Private Sectors, *Unadjusted*, January 2015

| | Both sexes | Males | Females |
|-----------------------|------------|--------|---------|
| Total Employed | 19,300 | 10,100 | 9,200 |
| Public employees | 7,800 | 3,100 | 4,600 |
| Total private sector | 11,600 | 7,000 | 4,600 |
| Private employees | 9,100 | 5,400 | 3,700 |
| Self-employed | 2,500 | 1,600 | 900 |

Public/Private Sector Employment, January 2013 - January 2015

- In January 2015, 40.4% of working Yukoners were employed by one of the four levels of government in the territory.
- Of the private sector, 21.6% were self-employed.
- In January 2015, private sector employment increased by 200, or 1.8%, from December 2014, while public sector employment remained the same.

Notes:

'Employees' include full-time, part-time, permanent and temporary employees.

'Public employees' are those who work for: a government at the federal, provincial, territorial, municipal, First Nations or other Aboriginal government level; a government service or agency; a Crown corporation; or for a government funded establishment such as schools (including colleges/universities), hospitals and public libraries.

'Private employees' include all employees who work for private firms or businesses.

Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as “employment/population ratio,” it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those that are caused

by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April’s unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories’ figures are not included in the calculation of Canada’s numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
