

Highlights:

- Yukon's June unemployment rate at 7.4% decreased 1.4 percentage points from May. This is the first month a decrease in the unemployment rate has been seen since November 2011.
- The national unemployment rate, 7.2%, declined 0.1 percentage points from one month earlier.
- Employment in the territory increased to 18,800 in June, down from the record-high December '11 figure of 19,700.

June 2012 Yukon Employment at a Glance

Labour force.....	20,300
Employed.....	18,800
Unemployed	1,500
Unemployment Rate	7.4%

Unemployment Rate, Provinces and Territories, June '12

*Nunavut's unemployment rate is available only as an unadjusted estimate.

- Yukon's June labour force returned to April levels as 200 people left the job market. Unemployment declined, however, lowering the unemployment rate to 7.4%.
- Males age 15+ showed slight gains in employment in June, while employment for Females 15+ remained unchanged.
- Nationally, employment was little changed in June again, and the unemployment rate nudged down as fewer people searched for work. Compared with 12 months earlier, most of the employment growth was among private sector employees.

Comparisons with Canada - Snapshot

Participation Rate, Jun '12

Employment Rate, Jun '12

*Nunavut's participation rate and employment rate are available only as unadjusted estimates.

The participation rate measures the percent of the population which is working or actively looking for work. Yukon's participation rate in June 2012 was 75.5%, second-highest in Canada.

Yukon's June employment rate (which measures the percent of the population which is employed), at 69.9%, is tied for the second-highest in Canada, due to a high participation rate.

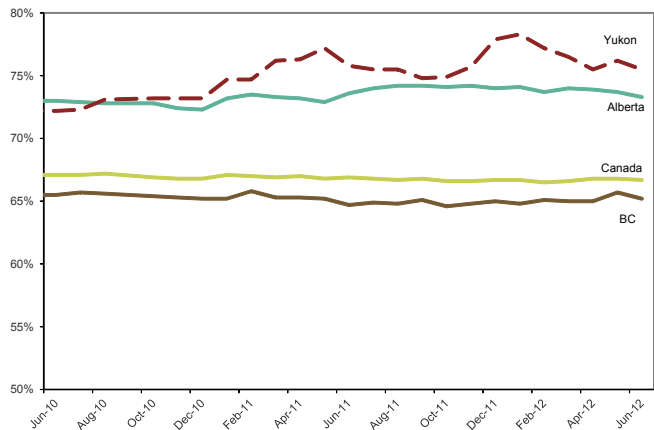

Comparisons with Canada - Historical

The Labour Force Survey estimates that 75.5% of Yukoners age 15 and over were employed or were seeking employment in June, slightly below the June '11 rate of 75.8%.

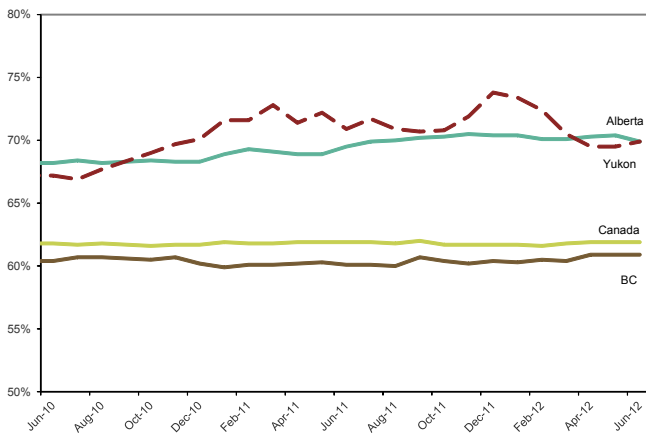

Yukon's participation rate began to decline in June 2011 as the percentage of Yukoners participating in the labour force declined for several months before rebounding in the fall/winter of 2011/12. January's rate of 78.3% was the highest it had been since June of 2002.

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's; however, as is often the case with a small population base, our rates show a higher degree of volatility.

Unemployment Rate, 25+, Males and Females, Jun '10 - Jun '12

Labour Force, *Unadjusted* and Annual, 15+

'Seasonally adjusted' refers to the technique of adjusting figures to remove seasonal movements. As such, seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted should not be made. For more information, see [definitions on pg 8](#).

Employment by Age and Sex, Jun '10 - Jun '12

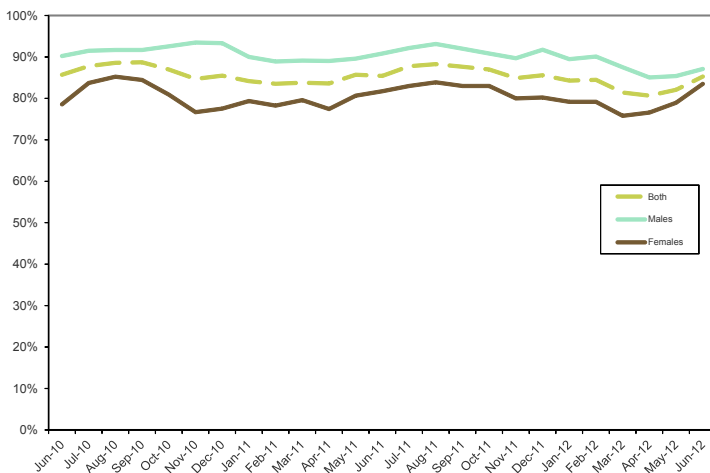

Unemployment Rate by Age and Sex, Jun '10 - Jun '12

Unadjusted, Full-time and Part-time Workers, June '12

Full-time employment as a percentage of all employment
Age 15+, Jun '10 - Jun '12

- The unemployment rate decreased slightly for both genders in both 15+ and 25+ age categories in June compared to May.
- 16,200, or 85%, of Yukon's 15+ workers were full-time in June.
- 84% of employed females held full-time employment, while 87% of males did.
- Nationally, 81% of employed Canadians worked full time in June.
- Yukon held the fourth-highest percentage of workers with full-time jobs in Canada, behind Nunavut, NWT and Newfoundland and Labrador.

Employment, *Unadjusted*, by Industry, June '12

	Both sexes	Males	Females
Total employed	19,000	9,300	9,700
Goods-producing sector	3,100	2,500	600
Forestry, fishing, mining, oil and gas	700	600	x
Construction	2,000	1,600	400
Services-producing sector	15,900	6,800	9,100
Trade	1,800	800	1,000
Transportation and warehousing	900	700	200
Finance, insurance, real estate and leasing	800	400	400
Professional, scientific and technical services	1,400	700	700
Educational services	1,600	500	1,100
Health care and social assistance	2,400	500	2,000
Information, culture and recreation	1,500	700	800
Accommodation and food services	900	300	600
Other services	600	300	300
Public administration	3,600	1,600	2,000

x = suppressed for confidentiality

Note: The sum of industry rows shown does not equal sector totals as industries with fewer than 500 workers are not shown.

- 15,900, or 84% of working Yukoners were employed in the service-producing sector in June.
- 65% of Yukoners working in the goods-producing sector had jobs in the construction industry.
- While females accounted for 57% of workers in Yukon's services-producing sector, only 19% of goods-producing sector workers were female.
- Employment in the goods-producing sector was down 100 workers, or 3%, from last June; employment in the services-producing sector is down by 100 workers, or 1%, to 15,900.

Goods and Services-Producing Sectors,
Employment, Jun '10 - Jun '12

Goods and services producing sectors

The goods-producing sector includes those industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector are industries primarily in construction and mining.

The services-producing sector includes industries involved in the provision of services.

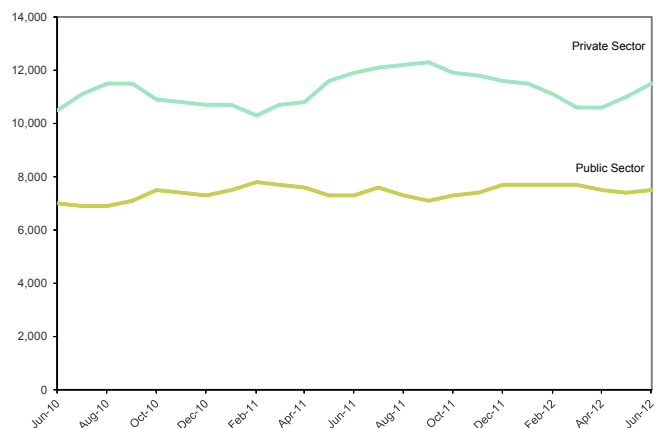

Public and Private Sectors, *Unadjusted*, June '12

	Both sexes	Males	Females
Total Employed	19,000	9,300	9,700
Public employees	7,500	2,900	4,600
Total private sector	11,500	6,400	5,100
Private employees	8,700	4,500	4,200
Self-employed	2,800	1,900	900

Note: 'Public employees' includes federal, territorial, First Nation and municipal employees.

- In June, 39% of working Yukoners were employed by one of the four levels of government in the territory.
- Of the private sector, 24% were self-employed.
- Public sector employment is up by 200, or 3% from last June, while private sector employment was down by 400, or 3% from last June.

Public/Private Sector Employment, Jun '10 - Jun '12

Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as “employment/population ratio,” it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal

movements are defined as those that are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April’s unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories’ figures are not included in the calculation of Canada’s numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
