Definitions.....	8

Seasonally adjusted refers to the technique of adjusting figures to remove seasonal movements. As such, seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted figures should not be made. For more information, see [definitions on page 8](#).

Unadjusted figures are available on page 5.

Comparisons with Canada - Snapshot

Participation Rate, March 2014

Employment Rate, March 2014

*Nunavut's participation rate and employment rate are available only as unadjusted estimates.

The participation rate measures the percent of the population which is working or actively looking for work. Yukon's participation rate in March 2014 was 76.7%, the highest in Canada.

Yukon's March employment rate (the percentage of the population which is employed), at 73.1%, was also the highest in Canada.

Comparisons with Canada - Historical

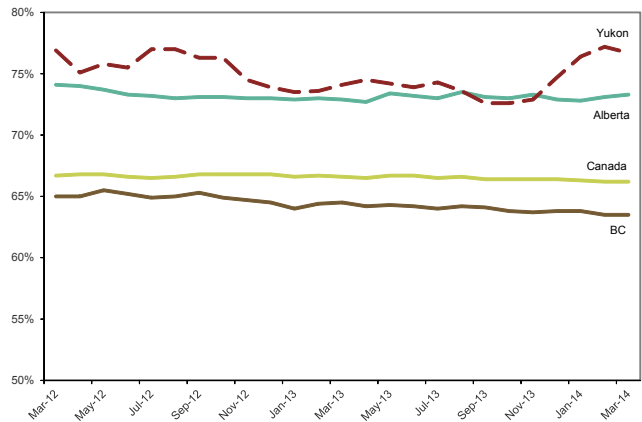

The Labour Force Survey estimates that 76.7% of Yukoners aged 15 years and over were employed or were seeking employment in March 2014.

Yukon's participation rate in March 2014 (76.7%) decreased 0.5 percentage points from February 2014 (77.2%) and increased 2.6 percentage points compared to March 2013 (74.1%).

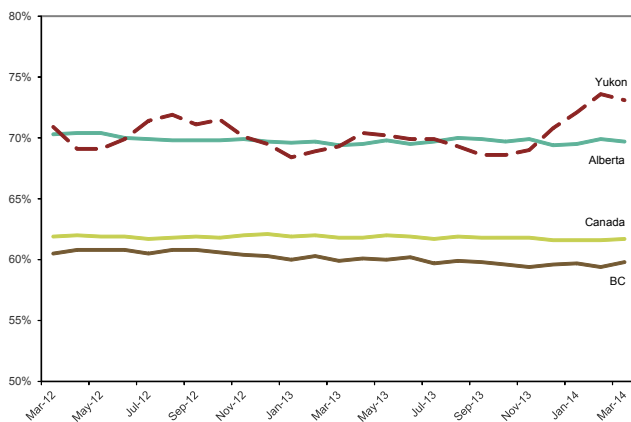

The March 2014 employment rate of 73.1%, decreased 0.5 percentage points from February 2014 (73.6%) and was up 3.8 percentage points compared to March 2013 (69.3%).

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's. However, as is often the case with a small population base, our rates show a higher degree of volatility.

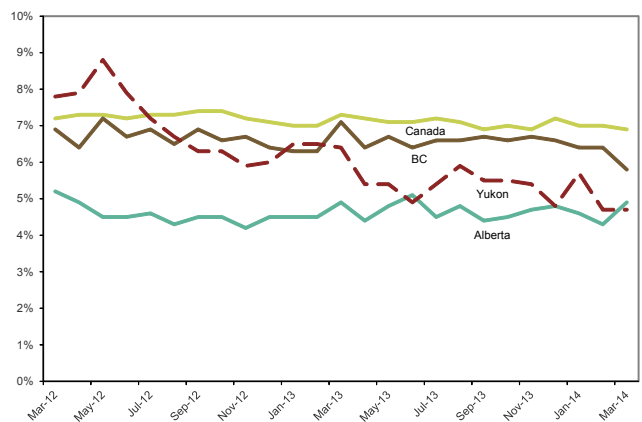

Participation Rate, Mar 2012 - Mar 2014

Employment Rate, Mar 2012 - Mar 2014

Employment by Age and Sex, Mar 2012 - Mar 2014

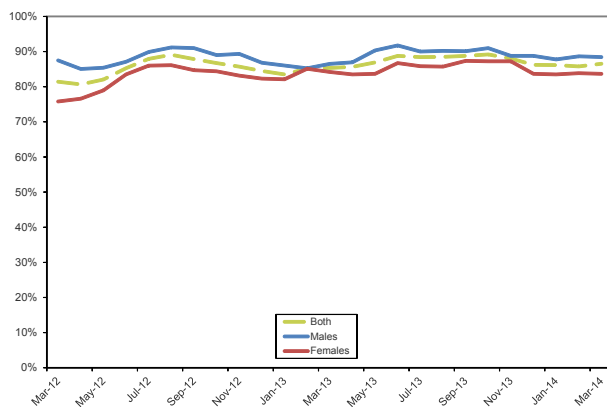

Unemployment Rate by Age and Sex, Mar 2012 - Mar 2014

- Comparing March 2014 to February 2014, the unemployment rate for males aged 15 years and over increased from 6.7% to 6.8% and the rate for males aged 25 years and over increased from 6.5% to 6.6%. The rate for females aged 15 years and over increased from 4.8% to 4.9%, and the rate for females aged 25 years and over increased from 4.3% to 5.4%.
- Yukon's youth unemployment rate (aged 15-24) has consistently been under 10% for the last six months including March 2014 (unemployment rate suppressed due to number of unemployed being less than 200 in March).

Employment, *Unadjusted*, by Full-time/Part-time, Mar 2014

Full-time employment as a % of all employment Age 15+, Mar 2012 - Mar 2014

- Of Yukon's workers aged 15 years and over, 16,700, or 86.5%, were employed full-time in March 2014. This was the second-highest among all other jurisdictions.
- Nationally, 80.0% of employed Canadians worked full-time in March.
- Of employed Yukon males, 88.4% worked full-time, while 83.7% of employed Yukon females did.
- Comparing March 2014 to February 2014, full-time employment decreased by 200 to 16,700, while part-time employment decreased by 100 to 2,600.

Employment, *Unadjusted*, by Industry, Mar 2014

	Both sexes	Males	Females
Total employed	19,300	9,500	9,800
Goods-producing sector	2,600	2,400	200
Forestry, fishing, mining, oil and gas	500	400	x
Construction	1,500	1,500	x
Services-producing sector	16,700	7,100	9,600
Trade	1,900	1,100	800
Transportation and warehousing	1,100	800	300
Finance, insurance, real estate and leasing	900	400	500
Professional, scientific and technical services	1,400	400	900
Business, building and other support services	600	400	200
Educational services	1,400	300	1,100
Health care and social assistance	2,600	500	2,100
Information, culture and recreation	900	300	600
Accommodation and food services	1,200	600	600
Other services	600	300	300
Public administration	4,100	1,900	2,200

x = suppressed for confidentiality

Notes:

The sum of industries does not equal sector totals as industries with fewer than 500 workers are not shown; row data may not add up to industry totals due to rounding. 'Industry' refers to the general nature of the business carried out by the employer for whom the LFS respondent works (main job only).

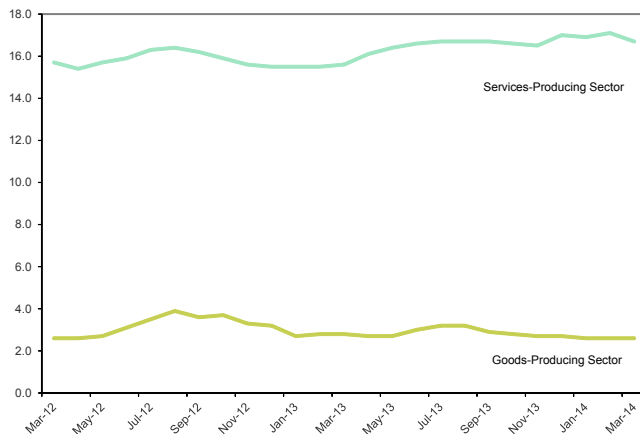

- In March 2014, 16,700, or 86.5% of working Yukoners were employed in the services-producing sector, while 2,600, or 13.5% were employed in the goods-producing sector.
- 57.7% of Yukoners working in the goods-producing sector had jobs in the construction industry; 19.2% in the forestry, fishing, mining, oil and gas industries.
- While females accounted for 57.5% of workers in Yukon's services-producing sector, only 7.7% of the goods-producing sector workers were female.

Goods- and services-producing sectors

The goods-producing sector includes industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector consists primarily of industries in construction and mining.

The services-producing sector includes industries involved in the provision of services.

Goods- and Services-Producing Sectors, Employment, Mar 2012 - Mar 2014

- Employment in Yukon's goods-producing sector peaked in August 2012 with 3,900 workers. Employment in the services-producing sector in February 2014 reached 17,100, the record-high level to date.
- Comparing March 2014 to March 2013, employment in the goods-producing sector decreased by 200, or 7.1%, while employment in the services-producing sector increased by 1,100, or 7.1%.

Public and Private Sectors, *Unadjusted*, Mar 2014

	Both sexes	Males	Females
Total Employed	19,300	9,500	9,800
Public employees	7,600	3,200	4,400
Total private sector	11,700	6,300	5,500
Private employees	8,500	4,400	4,200
Self-employed	3,200	1,900	1,300

- In March 2014, 39.4% of working Yukoners were employed by one of the four levels of government in the territory.
- Of the private sector, 27.4% were self-employed.
- Private sector employment decreased by 100, or 0.8%, from February 2014, while public sector employment decreased by 300, or 3.8%.

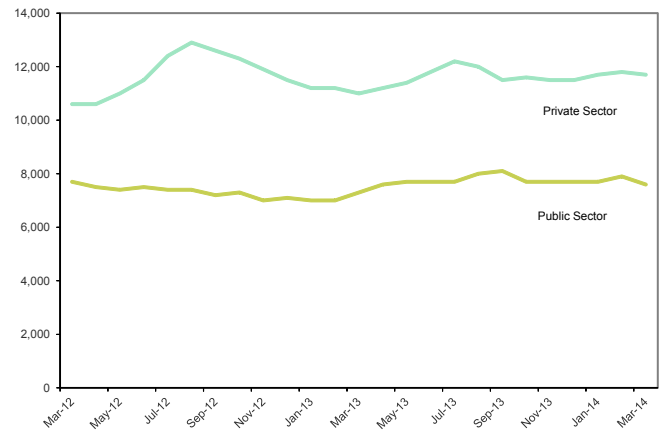

Notes:

'Employees' include full-time, part-time, permanent and temporary employees.

'Public employees' are those who work for: a government at the federal, provincial, territorial, municipal, First Nations or other Aboriginal government level; a government service or agency; a Crown corporation; or for a government funded establishment such as schools (including colleges/universities), hospitals and public libraries.

'Private employees' include all employees who work for private firms or businesses.

Public/Private Sector Employment, Mar 2012 - Mar 2014

Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as “employment/population ratio,” it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those that are caused

by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April’s unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories’ figures are not included in the calculation of Canada’s numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
