Yukon Employment November 2013

Highlights:

- Yukon's November 2013 unemployment rate was 5.4%, a decrease of 0.6 percentage points compared to October 2013.
- Compared to October 2013, Yukon's labour force increased by 100 to 20,200, while the number of employed remained the same and the number of unemployed decreased by 100.

November 2013 Yukon Employment at a Glance

Labour force.....	20,200
Employed.....	19,000
Unemployed	1,100
Unemployment Rate	5.4%

Unemployment Rate, Provinces and Territories, November 2013

*Nunavut's unemployment rate is available only as an unadjusted estimate.

- Nationally, comparing November 2013 to October 2013 figures, there was a slight increase in both the labour force (0.1%) and the number of employed (0.1%).
- The number of unemployed in Canada decreased by 0.7%, with the resulting unemployment rate remaining unchanged at 6.9%.

Definitions	8

Seasonally adjusted refers to the technique of adjusting figures to remove seasonal movements. As such, seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted figures should not be made. For more information, see [definitions on page 8](#).

Unadjusted figures are available on page 5.

Comparisons with Canada - Snapshot

Participation Rate, November 2013

Employment Rate, November 2013

*Nunavut's participation rate and employment rate are available only as unadjusted estimates.

The participation rate measures the percent of the population which is working or actively looking for work. Yukon's participation rate in November 2013 was 72.9%, the third highest in Canada.

Yukon's November employment rate (the percent of the population which is employed), at 68.6%, is also the third highest in Canada.

Comparisons with Canada - Historical

The Labour Force Survey estimates that 72.9% of Yukoners aged 15 and over were employed or were seeking employment in November 2013.

Yukon's participation rate in November (72.9%) increased slightly from October 2013 (72.6%) and decreased 1.6 percentage points compared to November 2012 (74.5%).

The November 2013 employment rate of 68.6% was the same as October 2013 and down 1.9 percentage points compared to November 2012 (70.5%).

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's. However, as is often the case with a small population base, our rates show a higher degree of volatility.

Employment by Age and Sex,
Nov 2011 - Nov 2013

Unemployment Rate by Age and Sex,
Nov 2011 - Nov 2013

- Comparing November 2013 to October 2013, the unemployment rate for males aged 15+ increased slightly from 4.8% to 4.9% and the rate for males aged 25+ decreased from 5.4% to 4.3%. The rate for females aged 15+ decreased from 5.1% to 4.0%, while for females aged 25+ it remained the same at 3.4%.
- Yukon's youth unemployment rate (aged 15-24) has been consistently over 10% since March of 2011, with the exception of last five months in 2013 including November, when it was 9.5%.

Employment, *Unadjusted*, by Full-time/Part-time, Nov 2013

Full-time employment as a % of all employment
Age 15+, Nov 2011 - Nov 2013

- 16,900, or 88.0%, of Yukon's workers aged 15+ were employed full-time in November 2013. This was the second-highest among all other jurisdictions.
- Nationally, 80.5% of employed Canadians worked full-time in November.
- 88.8% of employed Yukon males worked full-time, while 87.2% of females did.
- Comparing November 2013 to October 2013, full-time employment decreased by 400, while part-time employment increased by 200.

Employment, *Unadjusted*, by Industry, Nov 2013

	Both sexes	Males	Females
Total employed	19,200	9,800	9,400
Goods-producing sector	2,700	2,400	300
Construction	1,800	1,700	x
Services-producing sector	16,500	7,400	9,200
Trade	1,900	1,000	900
Transportation and warehousing	900	700	x
Finance, insurance, real estate and leasing	800	300	500
Professional, scientific and technical services	1,300	500	800
Business, building and other support services	600	400	200
Educational services	1,400	400	1,000
Health care and social assistance	2,200	500	1,700
Information, culture and recreation	1,100	400	700
Accommodation and food services	1,300	700	600
Other services	700	400	300
Public administration	4,200	1,900	2,300

x = suppressed for confidentiality

Notes: The sum of industry rows shown does not equal sector totals as industries with fewer than 500 workers are not shown.
Data may not add up to the totals due to rounding.

- In November 2013, 16,500, or 85.9% of working Yukoners were employed in the services-producing sector, while 2,700, or 14.1% were employed in the goods-producing sector.
- 66.7% of Yukoners working in the goods-producing sector had jobs in the construction industry.
- While females accounted for 55.8% of workers in Yukon's services-producing sector, only 11.1% of goods-producing sector workers were female.

Goods- and services-producing sectors

The goods-producing sector includes those industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector are industries primarily in construction and mining.

The services-producing sector includes industries involved in the provision of services.

Goods- and Services-Producing Sectors, Employment, Nov 2011 - Nov 2013

- Employment in Yukon's goods-producing sector peaked in August 2012 with 3,900 workers. Employment in the service-producing sector peaked in July 2013 when employment reached 16,700 and remained at the same level in August and September before declining slightly and was 16,500 in November 2013.
- Comparing November 2013 to November 2012, employment in the goods-producing sector decreased by 600, or 18.2%, while employment in the services-producing sector increased by 900, or 5.8%.

Public and Private Sectors, *Unadjusted*, Nov 2013

	Both sexes	Males	Females
Total Employed	19,200	9,800	9,400
Public employees	7,700	3,300	4,400
Total private sector	11,500	6,500	5,000
Private employees	8,500	4,500	4,000
Self-employed	3,000	2,000	1,000

Note: 'Public employees' includes federal, territorial, First Nation and municipal employees.

- In November 2013, 40.1% of working Yukoners were employed by one of the four levels of government in the territory.
- Of the private sector, 26.1% were self-employed.
- Private sector employment was down by 400, or 3.4%, from November 2012, while public sector employment increased by 700, or 10.0%.

Public/Private Sector Employment, Nov 2011 - Nov 2013

Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as “employment/population ratio,” it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal

movements are defined as those that are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April’s unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories’ figures are not included in the calculation of Canada’s numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
