

Yukon Employment September 2012

Highlights:

- Yukon's September unemployment rate at 6.3% decreased 0.5 percentage points from August. This is the fourth consecutive month a decrease in the unemployment rate has been seen.
- The national unemployment rate, 7.4%, increased 0.1 percentage points compared to one month earlier.
- Yukon's September labour force, employment and the number of unemployed each decreased by 100 compared to August of this year.

September 2012 Yukon Employment at a Glance

Labour force.....	20,600
Employed.....	19,300
Unemployed	1,300
Unemployment Rate	6.3%

Unemployment Rate, Provinces and Territories, September '12

*Nunavut's unemployment rate is available only as an unadjusted estimate.

Seasonally Adjusted, 25+	4
Seasonally Unadjusted, 15+	5
Age, Full Time and Part Time	6
Industry and Class of Worker	7
Definitions	8

- Yukon's employment in the Goods-producing sector was 3,600 workers in September, an increase of 200 compared to September '11 but a drop of 300 compared to August of this year.
- Of all employed workers in September of this year, 87.9% were full-time. This is the second-highest rate among the provinces and territories.
- Nationally, employment rose between August and September as a result of an increase in full-time work. Canada's unemployment rate increased 0.1 percentage points to 7.4%.

Comparisons with Canada - Snapshot

Participation Rate, September '12

Employment Rate, September '12

*Nunavut's participation rate and employment rate are available only as unadjusted estimates.

The participation rate measures the percent of the population which is working or actively looking for work. Yukon's participation rate in September 2012 was 76.3%, second-highest in Canada.

Yukon's September employment rate (which measures the percent of the population which is employed), at 71.5%, is also second-highest in Canada, due to the high participation rates.

Comparisons with Canada - Historical

The Labour Force Survey estimates that 76.3% of Yukoners age 15 and over were employed or were seeking employment in September, slightly above the September '11 rate of 74.8%.

Yukon's participation rate began to decline in June 2011 as the percentage of Yukoners participating in the labour force declined for several months before rebounding in the fall/winter of 2011/12. The January 2012 rate of 78.3% was the highest it had been since June of 2002.

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's; however, as is often the case with a small population base, our rates show a higher degree of volatility.

Unemployment Rate, 25+, Males and Females, Sep '10 - Sep '12

Labour Force, *Unadjusted* and Annual, age 15+

'Seasonally adjusted' refers to the technique of adjusting figures to remove seasonal movements. As such, seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted should not be made. For more information, see [definitions on pg 8](#).

Employment by Age and Sex, Sep '10 - Sep '12

Unemployment Rate by Age and Sex, Sep '10 - Sep '12

Unadjusted, Full-time and Part-time Workers, September '12

Full-time employment as a percentage of all employment
Age 15+, Sep '10 - Sep '12

- Comparing September to August 2012, the unemployment rate remained the same for males (6.5%) and increased slightly for females in the 15+ age categories. Females in the 15+ age category increased from 4.7% in August to 4.9% in September. Females in the 25+ age category decreased from 4.5% in August to 3.4% in September. Males in the 25+ age group remained the same as in August at 4.4%.
- 17,400, or 87.9%, of Yukon's 15+ workers were full-time in September.
- 91.0% of employed males held full-time employment, while 84.7% of females did.
- Nationally, 81.6% of employed Canadians worked full time in September.
- Yukon held the second-highest percentage of workers with full-time jobs in Canada - only behind Nunavut.

Employment, *Unadjusted*, by Industry, September '12

	Both sexes	Males	Females
Total employed	19,800	10,000	9,800
Goods-producing sector	3,600	2,900	700
Forestry, fishing, mining, oil and gas	700	600	x
Construction	2,200	1,900	300
Services-producing sector	16,200	7,100	9,100
Trade	2,200	1,200	1,000
Transportation and warehousing	900	600	300
Finance, insurance, real estate and leasing	800	400	400
Professional, scientific and technical services	1,200	500	600
Business, building and other support services	700	300	400
Educational services	1,300	400	900
Health care and social assistance	2,400	500	2,000
Information, culture and recreation	1,300	700	600
Accommodation and food services	1,400	500	900
Other services	700	300	400
Public administration	3,300	1,500	1,900

Note: The sum of industry rows shown does not equal sector totals as industries with fewer than 500 workers are not shown.

- 16,200, or 81.8% of working Yukoners were employed in the service-producing sector in September.
- 61.1% of Yukoners working in the goods-producing sector had jobs in the construction industry.
- While females accounted for 56.2% of workers in Yukon's services-producing sector, only 19.4% of goods-producing sector workers were female.
- Compared to last September, employment in the goods-producing sector was up 200 workers, or 5.9%, to 3,600; employment in the services-producing sector was up by 100 workers, or 0.6%, to 16,200.

Goods and Services-Producing Sectors, Employment, Sep '10 - Sep '12

Goods and services producing sectors

The goods-producing sector includes those industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector are industries primarily in construction and mining.

The services-producing sector includes industries involved in the provision of services.

Public and Private Sectors, *Unadjusted*, September '12

	Both sexes	Males	Females
Total Employed	19,800	10,000	9,800
Public employees	7,200	2,900	4,300
Total private sector	12,600	7,100	5,500
Private employees	9,500	5,100	4,400
Self-employed	3,100	2,000	1,100

Note: 'Public employees' includes federal, territorial, First Nation and municipal employees.

- In September, 36.4% of working Yukoners were employed by one of the four levels of government in the territory.
- Of the private sector, 24.6% were self-employed.
- Private sector employment was up by 300, or 2.4% from last September, and public sector employment was up by 100, or 1.4%.

Public/Private Sector Employment, Sep '10 - Sep '12

Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as “employment/population ratio,” it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal

movements are defined as those that are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April’s unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories’ figures are not included in the calculation of Canada’s numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
