Yukon Rent Survey Comparison of Average and Median Rent March 2008 to April 2016

This publication is a comparison of median and average rent statistics in Whitehorse and Watson Lake for March 2008 to April 2016. **Prior data is available upon request.** These statistics are derived from the Yukon Rent Survey which, as of 2014, is conducted on a semi-annual basis in April and October. Prior to 2014, the survey was conducted on a quarterly basis and only included buildings with 3 or more rental units (4 or more rental units prior to 2012). Although the methodology of the 2014 survey includes buildings with 1 or more rental units, (http://www.eco.gov.yk.ca/stats/pdf/rent_Oct15.pdf), the Yukon Bureau of Statistics continues to generate data for buildings with 3 or more rental units for historical comparisons. The tables below display this data.

Median Rent refers to the rent at the middle of the range with one-half of the rents being above the median (higher) and the other half below the median (lower). **Average Rent** refers to the sum of rents of all units divided by the total number of units.

Whitehorse

¹ Data is not available for Watson Lake bachelor suites or 3+ bedroom units due to small numbers in survey.

² Note that prior to 2012, buildings with less than four units were excluded from the survey. While the added 3-unit buildings comprise less than five percent of all units in the survey, figures prior to 2012 are not strictly comparable to subsequent numbers.
