

# YUKON BUREAU OF STATISTICS

## Population Report Second Quarter, 2018

### Highlights:

- The estimated population of Yukon on June 30, 2018 was 40,483; an increase of 816, or 2.1%, compared to the revised figure for June 30, 2017 (39,667).
- Comparing June 30, 2018 to June 30, 2008, Yukon's population increased by 7,189, or 21.6%. The population of the Whitehorse area increased by 6,227, or 24.6%; Dawson City increased by 434, or 23.0%; and Watson Lake decreased by 99, or 6.2%.

### Notes on methodological changes:

Yukon Bureau of Statistics (YBS) population estimates prior to June 2010 were based on information in Yukon Health Care Insurance Plan (YHCIP) files and the data from a semi-annual health care update survey that estimated the number of plan members who were no longer Yukon residents. In 2010, the estimation model was revised and the population counts for June 2010 through December 2014 were derived by tracking changes in YHCIP files and some other administrative data files. In 2015, the model was further revised to make the approach more comprehensive based on the information in all relevant administrative data files of Yukon government departments.

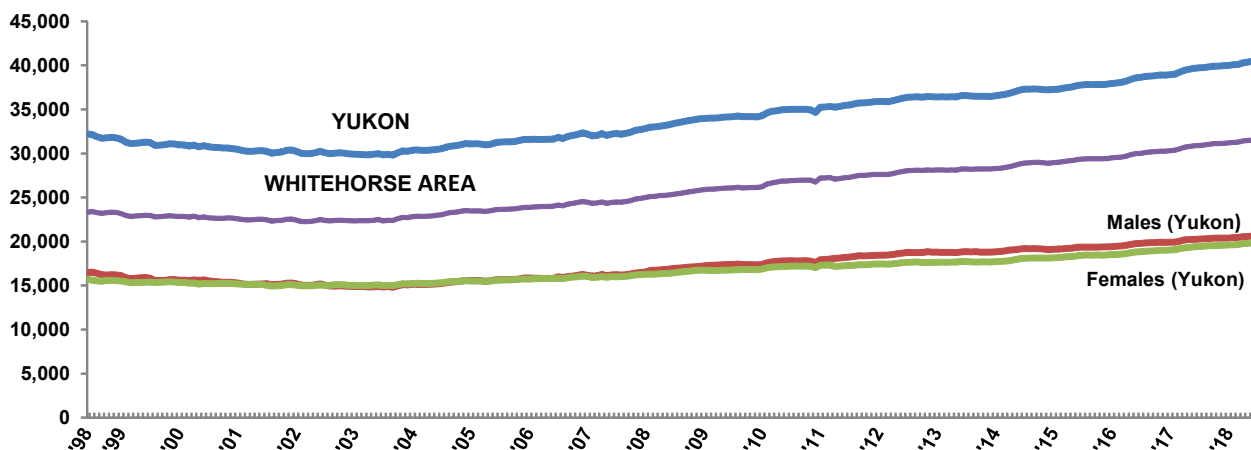

In 2018, the model was revised once again. Population estimates for the period from April 2011 to June 2017 were calibrated based on 2016 census population counts adjusted for net undercoverage. Thereafter, monthly population is estimated from the results of a model of migratory growth based on recent trends applied to the information in all relevant administrative data files, including YHCIP files.

The model assigns residents of unorganized areas to their nearest communities. Estimates for Whitehorse include population in surrounding areas *as well as in Marsh Lake* to remain comparable with the geographical area defined by Statistics Canada as the Whitehorse Census Agglomeration.

All monthly estimates are as of the last day of the month. The June estimates represent annual figures.

Due to the change in methodology in 2018, figures presented in this publication for the period from April 2011 onward are not strictly comparable to figures prior to the period.

### Monthly Population, June 30, 1998 to June 30, 2018

- Yukon's population declined almost steadily from 1998 to 2001, and then fluctuated around 30,000 from 2001 to 2004.
- An upward trend was regained in 2004 and the population increased almost steadily with successive record highs<sup>1</sup> in most quarters. The June 30, 2018 population at 40,483 is the new record-high for Yukon.
- On June 30, 2018, Yukon's population (40,483), increased by 364 people, or 0.9%, from March 31, 2018 (revised 40,119), and increased by 816 people, or 2.1%, from June 30, 2017 (revised 39,667).

<sup>1</sup> Accurate population counts during the Gold Rush are not available. However, the first Census population figure for Yukon was 27,219 in 1901.

# Population by Subdivision in Whitehorse Area

**Note:** Residents of Whitehorse area are assigned to subdivisions based on their addresses in various administrative files. Some addresses in these files appear inconsistent or incomplete. Efforts have been made to resolve any apparent inconsistency or incompleteness of information by validating the information against multiple sources. Changes in subdivision populations from one time period to another are not only due to natural population change and migrations, but may also be due to reassignments of previously inaccurate addresses on file.
