The Yukon Rent Survey is a Yukon Bureau of Statistics (YBS) survey that has historically been conducted in the third month of every quarter (March, June, September and December) in Whitehorse, Watson Lake, Haines Junction and Dawson City. Beginning in 2014, the survey is being conducted on a semi-annual basis in April and October. In addition to the change in frequency, the survey methodology has been updated and the survey universe has been expanded to cover all types of buildings with rental units (single detached houses, townhouses/row houses, duplexes, triplexes and fourplexes, condominiums, apartment buildings, store-top (commercial), and mobile homes). Subsidized or government-owned housing, and informal or illegal units remain excluded from the survey.

Despite the change in methodology, YBS will continue to generate median rent and vacancy rates for units in buildings with 3 or more rental units using comparable methodology to maintain the time series for historical comparisons. Pages 2 to 4 of this report include estimates based on the new methodology, while the analysis on the first page refers to buildings with 3 or more rental units. The graph below displays historical trends¹ of median rent and vacancy rates in Whitehorse.
