About Retail Trade

Retail trade figures are estimates of the sum of retail sales in an area. Canada's sales levels are published on a monthly basis, both seasonally adjusted and not seasonally adjusted, for all provinces and territories and for three census metropolitan areas. The monthly results are released by Statistics Canada about 50 days after the end of the reference month.

This publication includes data from the monthly Retail Trade Survey. Statistics Canada also releases annual figures based on the annual Retail Trade Survey; however, these figures are not discussed in this publication as they are released two years after the reference period and are not directly comparable to the monthly figures.
